Authorization Simplification

PL01 Update

Group Name	User Code	User Name	Department	From	To
1 Finance	Kora	Kora Dean	General		
2 Sales	Vicky	Vicky Purchas	General	20.11.17	24.11.17
3 Purchase					
4 Inventory					

#	Group Name	Description
1	CRM	
2	Sales	Sales

Feature

- Authorization Groups renamed to User Groups and relocated under Setup - General.
- 4 Group Types:
 - Authorization: User authorizations with validity dates; individual users within the User Group can have further refined validity dates.
 - Form Settings: User form settings.
 - UI Configuration Templates: Modified forms set as templates. **(PL01)**
 - Cross All Types: Applies to all types.
- Copy Form Settings now has a Groups tab; all users in the chosen group inherit the form settings.

Benefit

- Manage temporary authorizations.
- Quickly apply form setting defaults and/or templates (modified forms) to a group of users.

Approval Status Report

Document Type	Document No.	Draft No.	Originator	Template	Status	Remarks	Draft Key
▶ Purchase Request	➔ 1		Jayson Butler		Generated		➔ 1
▶ Purchase Request		➔ 1	Jayson Butler		Pending		➔ 2
▶ Purchase Request		➔ 1	Jayson Butler		Canceled (restorable)		➔ 3

Feature

- Enable updating a previously approved document.
- Enable updating a draft document with status Pending/Approved.
- Approval Decisions Report now shows the Draft Key. **(PL01)**

Benefit

- You are now able to amend/cancel a document processed through the approval process.
- Approver always sees the latest version of the document to be approved.
- Ensures approval is obtained every time the approval criteria have been triggered whether adding or updating the document.

Feature

- The User – Setup form is enhanced to include various user-specific options, that previously used to be in the General Settings form.
- New icon on the toolbar enables users to access their user setup form and personalize it.
- The User Defaults form is extended and includes Display tab.

Benefit

- Better accuracy and clarity of company level settings vs. user-level settings.
- Enhanced usability – all users gain access rights to their own personal preferences (subject to authorizations).
- Better coverage of user defaults settings, enables more efficient implementation.

Import from Excel (1/2)

The screenshot displays three overlapping SAP windows. The top window, 'Import from Excel', shows a dropdown menu for 'Data Type to Import' with 'Journal Entry' selected. The middle window, 'Authorizations', shows a tree view with 'Data Import' expanded and 'Import from Excel' highlighted. The bottom window, 'Serial Numbers - Setup', shows a table with one row of data and an 'Import From Excel...' button highlighted.

#	Doc. No.	Item Number	Item Description	Whse Code	Whse Name	Total Needed	Total Created	Open Qty
1	PD 738	A00006	Rainbow 1200 Laser Series	01	General Warehouse	5		5

#	late	Mfr Date	Admission Date	Mfr Warranty Start	Mfr Warranty End	Location	Details
1			12.05.17				

Feature

- Journal Entries added to Import from Excel.
- Import Serial and Batch numbers from Excel.
- Additional Authorizations added for data import.

Benefit

- Simpler, efficient import process.
- DTW not required for importing these objects.

Change Log Cleanup Utility

Change Logs Cleanup

Introduction
The change logs cleanup utility allows you to delete change logs of various documents and master data. Determine the range of change logs to be deleted by setting date into Logs Clean Up To.
Select the documents/master data to clean up their change logs. Executing the cleanup will delete change log entries which were created on a date which is equal or smaller than the selected date.

Warning: Deleting the change log data is irreversible

Change Logs Cleanup: Start a New Cleanup

Cleanup Scenario: CLC20170606
Cleanup Date: 06.06.17

Summary:
In total, %d log entries were deleted successfully

Feature

- New Change Log Cleanup Utility available.
- Enables users to clean out the change log to reduce the size of a company database.
- Users have the ability to determine which objects from the change log entries should be deleted and restrict the deletion to a specific date range.
- Utility subject to appropriate user authorisation.

Benefit

- Improve performance when running upgrades due to reducing amount of data to be upgraded.
- Companies running SAP Business One for a long time with a large change log are able to delete old changes that were registered.

Target:

Data Categories:

- Customization
- Administration
- Financials
- Business Partners
- Inventory
- Resources
- Production
- MRP
- Human Resources

Source or Target:

- Copy to File
- Copy from File
- Copy to Company: OEC Computers UK(dewdfth12415:30015)

Copy Method:

- Add New Records and Update Existing Records
- Add New Records Without Updating Existing Records
- Update Existing Records Without Adding New Records
- Delete All Records Then Add New Records

Error Handling:

- Ignore All Errors and Copy Valid Records
- Errors Terminate the Copy Process

If Target Records Are Missing UDFs:

Copy Options:

- When Copying Objects with Accounts
- When Copying Empty Fields
- Force Backup Before Starting Copy Process
- Allow Copying When Multiple Connections to the Database Exist Copy Process

Note: To ensure data integrity, it is recommended that you avoid copying while there are multiple connections to the data

Find By: Company Name Database Name

OK Cancel

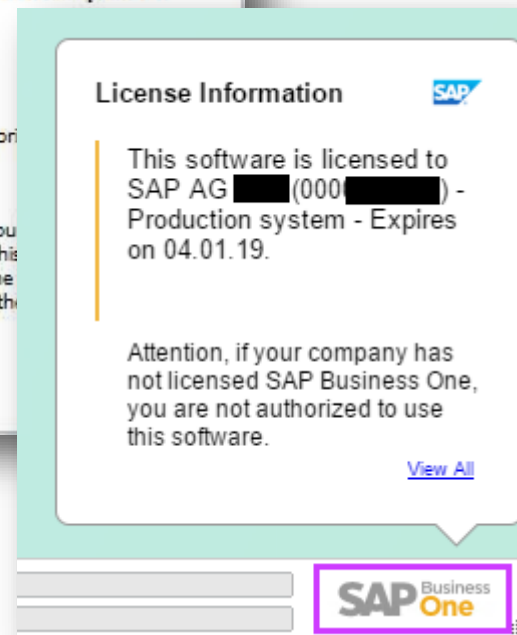

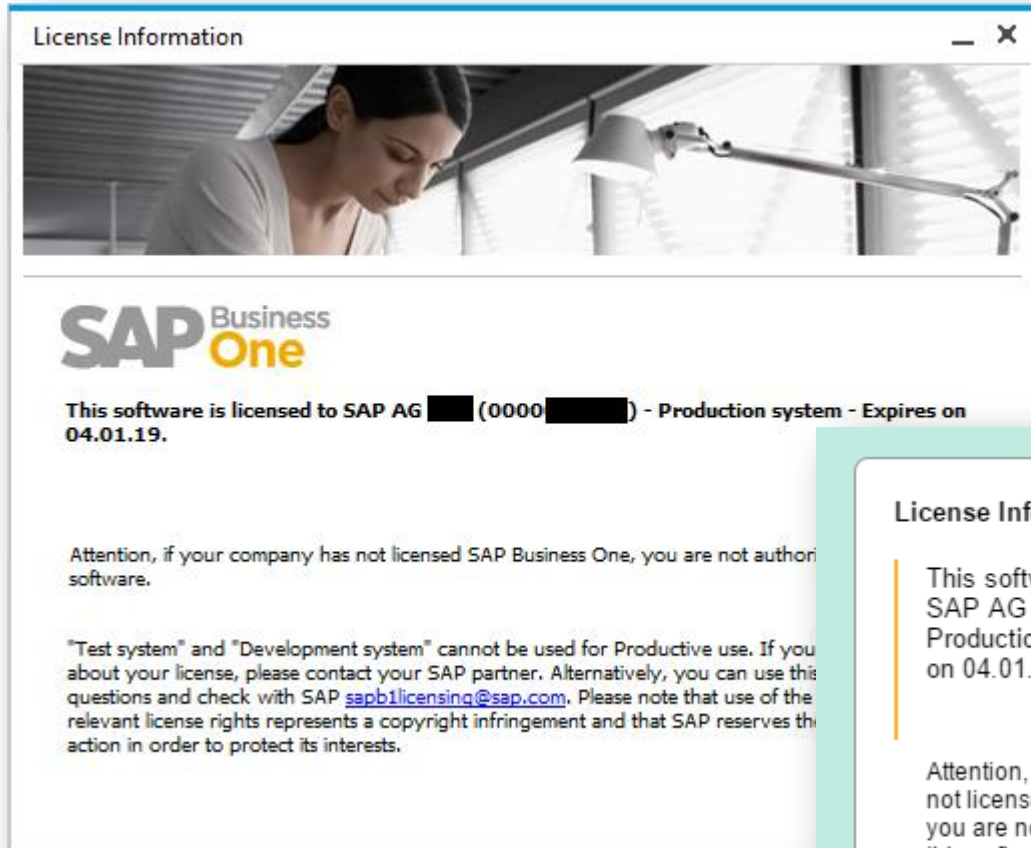

Feature

- Ability to copy data directly to target companies.
- Allows copying to a target company when connections exist to that company.

Benefit

- Saves time and effort without the need to copy data to a file first and then import the file into the target company database.
- Useful when copying data between test DBs and production company DBs.
- Users no longer need to be disconnected and interrupted during the data copying process.

License Updates

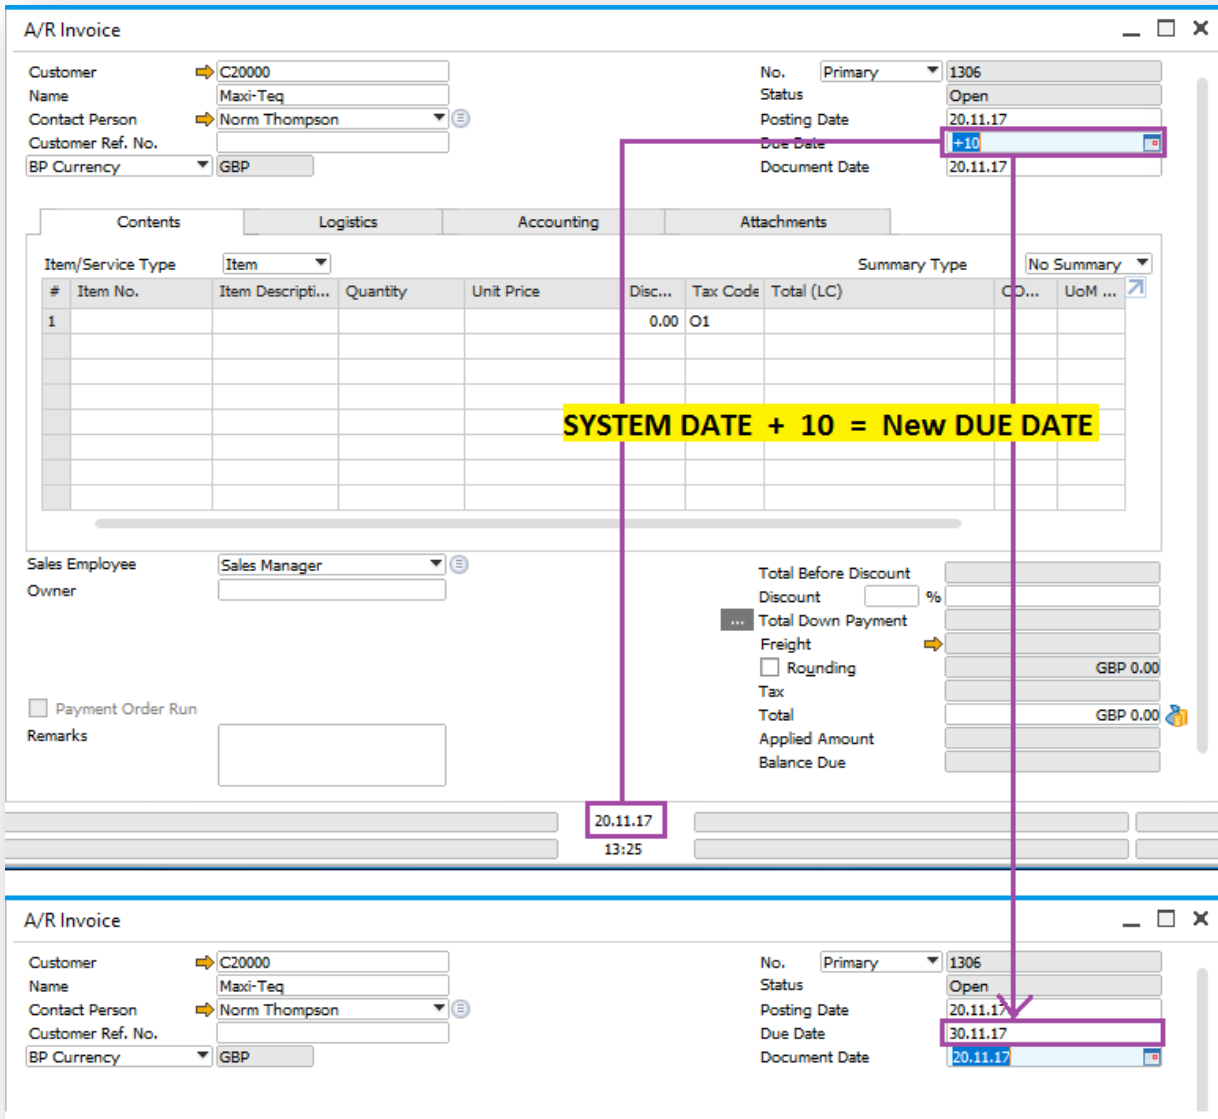

Feature

- As of release 9.3, a new license file will need to be generated and imported for every new minor (9.x) release.
- A watermark will be displayed on the bottom right of the SAP Business One desktop and the information sourced from the license file.
- The watermark will appear at each login and can be closed by the user by clicking on the SAP Business One icon.

Benefit

- Visibility for customers/end users to obtain relevant information about their licensed system.
- The new license file is more secure and protects the misuse of licenses.

Multiple Ways to Input Dates

Feature

- New way to add dates in date fields
- To enter a new date in the date field you can use the following two methods:
 - 1- Use arrow keys
 - Up/Down arrows to increase/decrease respectively date in steps of 1 day
 - 2- Use operands
 - +/-N : add/subtract N days
 - +/-ND : add/subtract N days
 - +/-NM : add/subtract N months
 - +/-NY : add/subtract N years
 - NOTE: You can only use D,M,Y (not case sensitive)
 - NOTE: Do not leave a space between the operand, number and period

Benefit

- Quicker date input
- Ease of Use

Display Database Field Name for Import from Excel

Feature

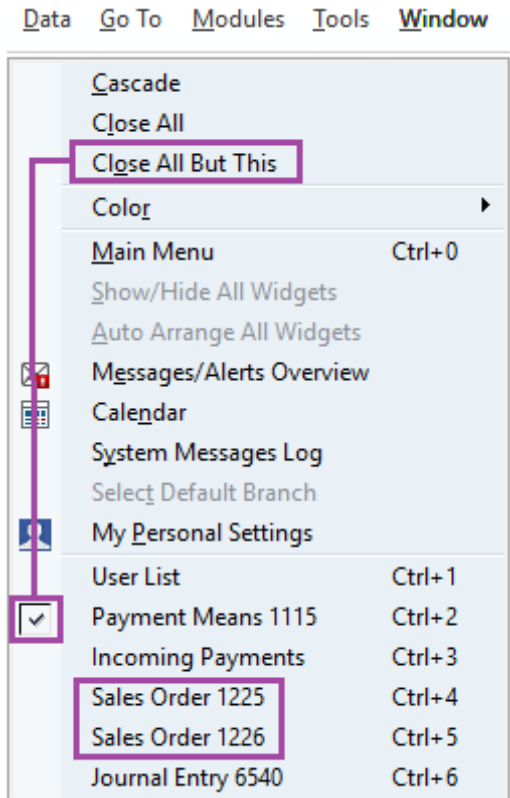

- Checkbox : Display Database Field Name
- Provides the database table and field name into where the information will be imported

Benefit

- Clear understanding of the target tables/fields
- Accurate data import

Managing Multiple Open Windows

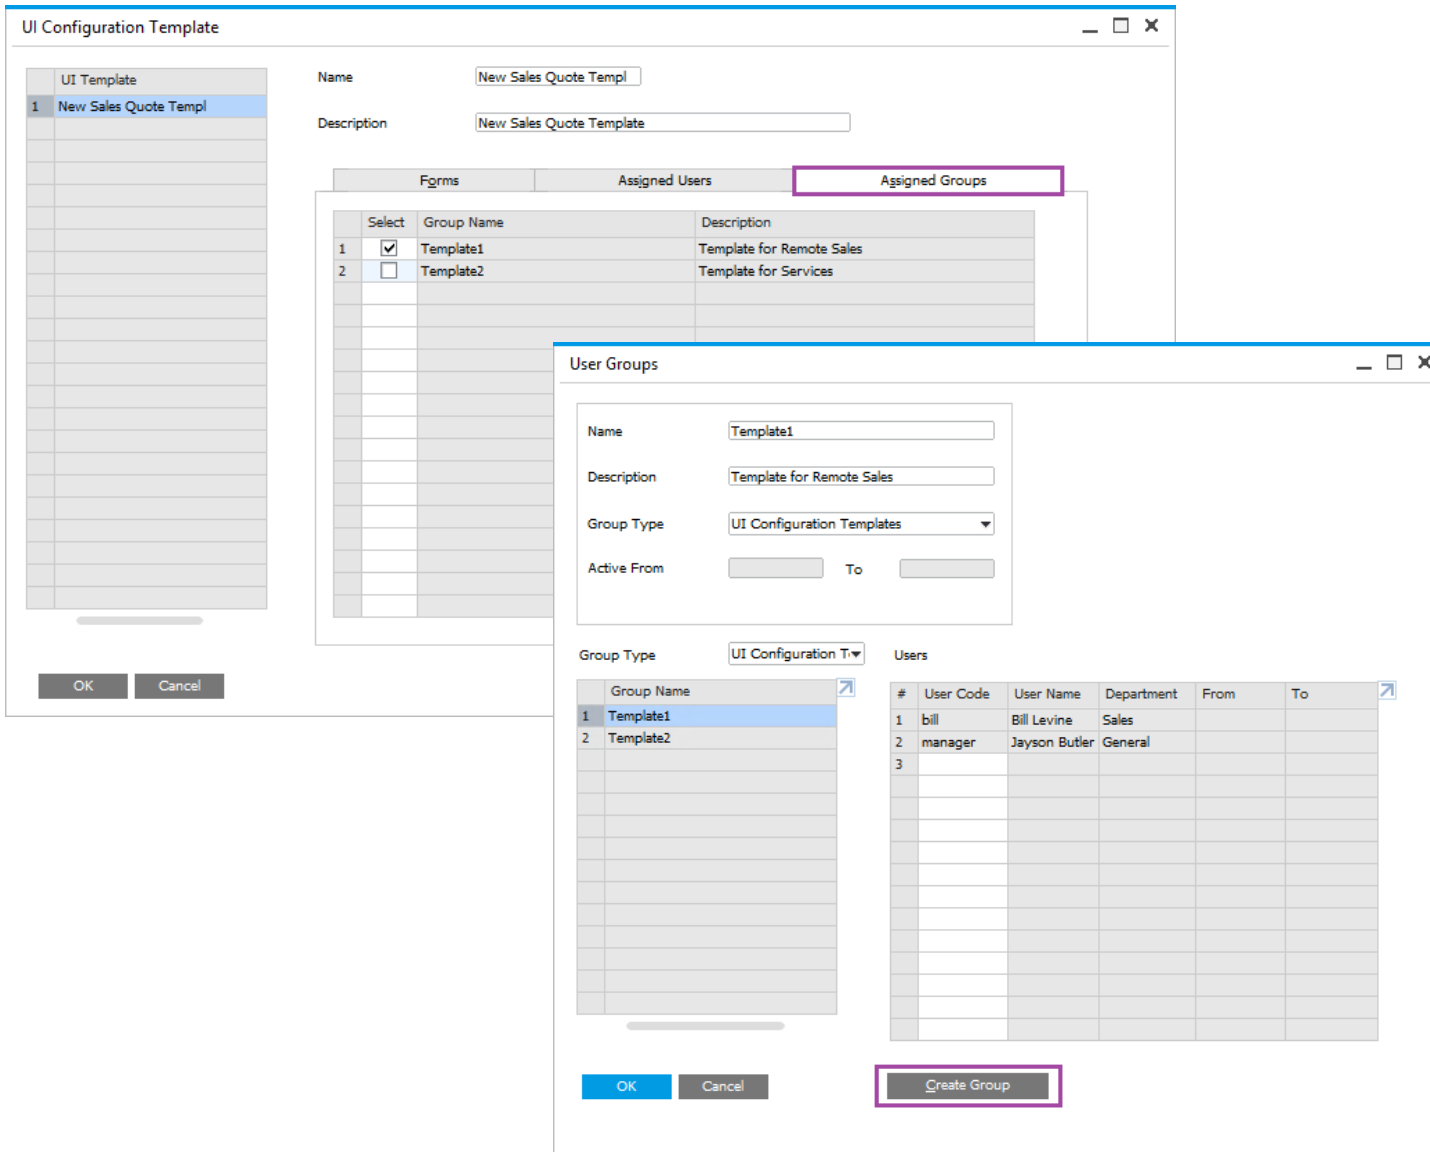

Feature

- In addition to close all windows, you have the option to leave the window that is currently being worked on
- Dependent forms will not be closed e.g. where a payment means form is open the underlying incoming payment screen will stay open
- Unique identifier (document number) helps user to choose the correct window to access

Benefit

- Increase efficiency
- Quickly get access to the relevant window where many similar ones are open

User Group selection in UI Configuration Template

The screenshot displays two overlapping SAP dialog boxes. The background dialog is 'UI Configuration Template' with the following details:

- Name: New Sales Quote Templ
- Description: New Sales Quote Template
- Assigned Groups table:

Select	Group Name	Description
<input checked="" type="checkbox"/>	Template1	Template for Remote Sales
<input type="checkbox"/>	Template2	Template for Services

The foreground dialog is 'User Groups' with the following details:

- Name: Template1
- Description: Template for Remote Sales
- Group Type: UI Configuration Templates
- Active From: [] To: []
- Group Type dropdown: UI Configuration T
- Users table:

#	User Code	User Name	Department	From	To
1	bill	Bill Levine	Sales		
2	manager	Jayson Butler	General		
3					

Buttons: OK, Cancel, and Create Group (highlighted with a purple box).

Feature

- You can now assign Groups to UI Templates.
- These Groups must first be created in User Groups using the Group Type UI Configuration Template.

Benefit

- Quickly apply UI Templates predefined groups of users.

Administration

Feature	Description	Localization
Multi-Branch Supporting Data Ownership	When managing multiple branches the system can be set such that a user's access to BPs and Documents is possible only when the BPs'/Documents' branch assignment matches the user's branch assignment.	All
Multi-Branch Filtering and Transactions	Conversely, with the filtering functionality, in the choose from lists, the user is restricted to BPs and Documents having the same branch assignment. The user can, however, access all BPs/Documents by typing in the exact code/number. Additionally, reports can be filtered by branch selection.	All
HTML based Online Help	We now support HTML based Online Help files.	All
Browser Access Session Timeout	The session timeout setting is now adjustable when editing the browser access service in the system landscape directory.	All

Feature

- Define price per pricing unit, e.g. price per 1000 units of a given item.
- Price list reflects this with the additional field Pricing Unit.

Benefit

- Accurate pricing for small value items.

Special Prices for Business Partners

BP Code: C20000 BP Name: Maxi-Teq BP Type: Customer Price Mode: Net
 Price List: Regular Sales Price
 Discount Percentage: 0.00
 Find:

#	Item No.	Item Description	Price List	Primary Curre...	Discount %	Source Price	Price after Discount	A.
1	C00001	Motherboard P4 Turb	Regular Sales Price	GBP 300.00	10.00	Price - Pri.	GBP 270.00	<input checked="" type="checkbox"/>
2			Regular Sales Price		0.00	Price - Pri.		<input checked="" type="checkbox"/>

Active From 01.05.17 To 31.05.17

OK Cancel Add Items Copy Discounts

Feature

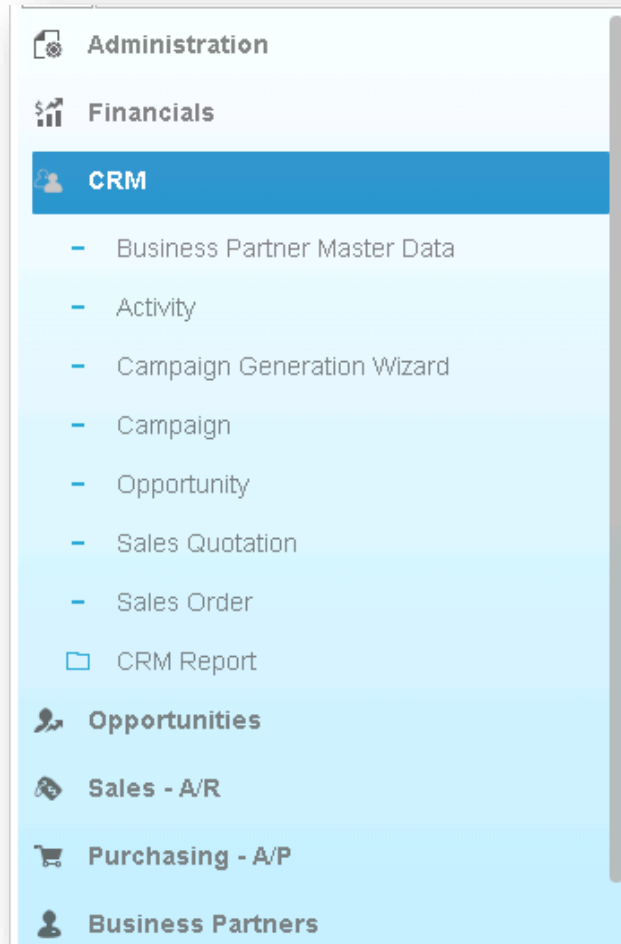

- Pricing hierarchy per BP – options to override the existing logic for selecting effective prices by applying the highest/lowest price per BP.
- Special prices can be limited by an active period.

Benefit

- More flexible pricing functionality by BP.
- Minimize incorrect discounting and maximizing revenue.
- Increase productivity and simplify customization.

Centralized CRM Module

Feature

- New module “CRM” is added under the financials module, listing all the functions related to CRM.

Benefit

- Centralized CRM module enhances usability and increases productivity.

CRM Enhancements

The screenshot displays three overlapping windows from the SAP CRM system:

- Activity Window:** Shows details for a 'Phone Call' activity. The 'Assigned To' field is set to 'Recipient List' and 'Management Team'. The 'Assigned By' field is 'Jayson Butler'. The activity is scheduled for 17.05.17 from 17:29 to 17:44, with a duration of 15 minutes.
- Recipient List - Management Team Window:** A table listing recipients for the activity:

#	User Name	Department	Branch	Recipient Type
1	keith	Logistic	Main	User
2	mary	Logistic	Main	User
3	Kora	General	Main	User
4	manager	General	Main	User
- Activities Overview Window:** A table showing a list of activities with their handlers:

Number	Start Date	Start Time	Handled By	Activity	Recurrence	BP Name	Contact Person	St...
1	18.07.16	12:42	Jayson Butler	Meeting	None	Maxi-Teq	Norm Thomp	
3	17.05.17	17:29	Management Team	Phone Ci	None			
4	17.05.17	17:34	Multiple	Phone Ci	None			
5	17.05.17	17:34	Jayson Butler	Phone Ci	None			

Feature

- Activity can be assigned to multiple users/employees; respective recipient lists can be created and maintained for this purpose.
- Activities Overview indicates handlers, be it single or multiple.

Benefit

- Increases efficiency - no need to create an activity for each user.

Feature

- Manage authorisations for generating and executing campaigns.
- Load saved campaigns, executed or non-executed.
- Find function added to the following forms:
 - Target Group Details
 - Target BPs in Manual Campaign
 - Target BPs in Campaign Generation Wizard
- Campaign List – Selection Criteria expanded to enable filtering by linked Documents.
- Sales Amount and Gross Profit reflected in Campaign List.

Benefit

- Users can differentiate between executed and non-executed campaigns.
- Improved usability and analysis of campaign successes and failures.
- More easily search for details within a target BP list.
- Greater control over campaign execution.

Blanket Agreements (1/2)

Sales Blanket Agreement

1	Printers	100	EUR 100.00	10	GBP 2,500.00	50
2						

Feature

- Determine exchange rate in blanket agreement when BP currency is foreign currency and blanket agreement is managed on the document header.
- Enable updating planned amount, planned quantity, and price in blanket agreement that is linked to other documents.
- Add committed/ordered qty/amount to *Details* tab.
- Control the deviation from blanket agreement planned amount or planned quantity.
- Determine shipment type within the blanket agreement.
- Payment Method and Payment Terms in the blanket agreement can be determined when the blanket agreement is not managed on the document header.
- When no document is linked to the blanket agreement, you are able to update the Start Date.
- Option to automatically assign a valid Blanket Agreement where no default Blanket Agreement is chosen from many and only one is valid.
- Manage customer/vendor reference no. in blanket agreement.
- Display document status in Documents tab.
- Manage project code in blanket agreement.

Blanket Agreements

- Allow Multiple Blanket Agreements for Same Period
- Enable Updating Unit Price/Planned Quantity/Planned Amount in Blanket Agreement with Linked Documents

OK Cancel

Benefit

- Exchange rates can be an agreed blanket agreement term.
- Increases flexibility and productivity - user can update the blanket agreement terms instead of creating new one.
- Easily track committed/ordered qty/amount in blanket agreement which is not delivered yet.
- Better control over the purchasing process by blocking deviations from blanket agreements.

Feature	Description	Localization

Dropdown menu for UDF1: All, Empty, Filled, Enter Value

Feature

- Up to 5 user defined fields can be managed in the determination criteria screen.
- You can use these 5 UDFs in defining the rules in the Advanced G/L Account Determination Rules screen.
- Options available:
 - All – criteria not relevant
 - Empty – field must be empty
 - Filled – field must have a value
 - Enter Value – field has a specific value

Benefit

- More flexibility in determining account to be posted to based on business criteria.

Integrated Payment Engine

The screenshot displays the SAP Payment Wizard interface. The main window, titled "Payment Wizard", shows a "Payment Run Summary and Printing" section. The summary lists: 0 Payment orders were added, 1 Payments were added, 0 Checks were added, and 1 Bank transfers were added. The "Document and Report Printing" section includes checkboxes for Outgoing Payments, Incoming Payments, Non-Included Transactions, Country Summary, Currency Summary, BP Summary, Payment Method Summary, Bank Account Summary, and Payment Summary. A "Print" button is located at the bottom right of this section.

An inset window titled "Payment Engine" is shown in the foreground. It has a "Select Path" field set to "E:\temp\" and radio buttons for "Test Run" and "Production Run". The "Production Run" option is selected. The window contains a log of the production run process, including steps like "Start Payment Engine", "Handling outgoing payment...", "Check payment for bank Barclays", and "Production Run finished successfully". Buttons for "Create Files", "Cancel", and "OK" are at the bottom.

At the bottom of the wizard, a "Step 8 of 8" indicator is visible, along with buttons for "Bank File", "Cancel", "< Back", and "Finish".

Feature

- Integrated bank file created when Electronic File Manager (EFM) designed outbound bank file formats are linked to the payment method selected in the Payment Wizard.
- Note: Historical .dll bank file formats not designed with the EFM addon still require the Payment Engine Add-on.

Benefit

- Smoother and faster execution of payments and creation of bank files sent to house bank and/or customer bank.
- Payment wizard is more intuitive.
- No need to install the separate add-on, less time consuming and ready to use after installation.

Scheduled Batch Processing

Payment Wizard

Save Options
Specify how you want to process the payment wizard results: - Save selection criteria without recommendation report- Save recommendation report for future payment run- Generate payment orders - Generate payments and payment documents

Save Selection Criteria Only
 Save Recommendations
 Execute Payment Order Run
 Execute Payment Run
 Execute Payment Run on Server

Scheduled Time: 09.06.17 12:00

System Message
Payment wizard successfully scheduled
OK

Payment Wizard

Payment Run Selection
To create a payment run, select "Start New Payment Run". To view the selection criteria/recommendation report of a payment run, select "View Executed Payment Runs". To view an executed payment run, select "View Executed Payment Runs".

Start New Payment Run
 Load Saved Payment Run
 View Executed Payment Runs

Find

#	Payment Run Name	Date	Total	No. of Payments	Status
1	Wiz20170608n1	08.06.17	23,955.76	0	Scheduled

Feature

- Leverage the service layer for parallel processing on the server-side.
- Tasks are dispatched and scheduled in the Job Server.
- Payment Wizard transactions will initially be supported.
- New *Execute Payment Run on Server* option in the Payment Wizard with ability to schedule a specific date and time.

Benefit

- Handle heavy transactions with parallel processing.
- Allows users to close the payment wizard form or even the SAP Business One client as the task is running on the server side.
- Reduces the load on the client side by scheduling a future date and time for processing on the server.
- Faster processing time for large transactions.

Electronic File Layout Templates

The screenshot shows the SAP Business One interface. At the top is a menu bar (File, Edit, View, Data, Go To, Modules, Tools, Window, Help) and a toolbar. Below is the 'Document Journal' window with a table of transactions:

Seq. No.	Trans. No.	Posting Date	Series	Doc. No.	G/L Acct/BP Code	G/L Acct/BP Name	Debit/Credit (...)	Remarks
1	2197	25.07.16	Primary	IN 357				A/R Invoices
		25.07.16			C20000	Maxi-Teq	GBP 11,715.00	A/R Invoices
		25.07.16			207000	VAT Payable (output Tax)	GBP (1,715.00)	A/R Invoices
		25.07.16			400000	Sales Revenue (Domestic) - F	GBP (10,000.00)	A/R Invoices
2	2318	11.08.16	Primary	SI 136				Goods Receipt
		11.08.16			500500	Stock Difference Gains	GBP (1,165.00)	Goods Receipt
		11.08.16			130000	Raw Materials	GBP 1,165.00	Goods Receipt
3	2343	25.08.16	Prim					
4	2359	25.08.16	Prim					
5	2360	25.08.16	Prim					

Overlaid on the Document Journal is the 'EFM Report Form : [Document Journal into TXT]' dialog box. It has an 'Output File Name' field containing 'C:\Users\Administrator\AppData\Local\Temp\Output.txt' and a 'Result File' button. Below the dialog is an 'Error / Message Log' table:

#	Severity	Message
0	Info	EFM file loaded
1	Info	Analyzing file structure
2	Info	Loading Crystal form EFM package
3	Info	Handling Crystal from [CR_StatementOfCashFlows] started
4	Info	Executing get B1_CR_XmlDataSource
5	Info	Exporting xml from Crystal
6	Info	Exporting EFM file
7	Info	Exporting EFM file finished successfully
8	Info	Open result file by pressing Result Button or see the Log file by pressing Log Button

At the bottom right, a Notepad window titled 'Output.txt - Notepad' shows the generated XML output:

```

```

Feature

- Export SAP Business One form data into various file formats using XML. See [SAP Note](#).
- Create Crystal reports out of the XML and assign required fields inside EFM mapping file.
- Assign EFM GEP files as electronic file for any report.

Benefit

- Flexible generation of output files.
- One click user experience with generation of electronic reports with simple print preview.

Allow any Business Partner in A/R Invoice and Payment document header

Feature

- In the A/R Invoice and Payment screen you are now able to input any Business Partner (BP). The default BP can be removed.
- You can now activate the payment means screen directly from posted A/R and A/P Invoices.

Benefit

- Enhanced usability
 - Faster invoice and payment input for all BPs
 - Faster access to payment screen

Financial Management

Feature

- The context menu links to:
 - Project Overview form detailing the entire project and it's hierarchical structure in one table.
 - Time Sheet Report.
- Create stage dependencies across different project levels including subprojects.
- New column under Stages tab - *Finished Date* allows users to define an actual finish date of each stage which can be compared to the planned end date.
- A *Stage ID* field has been created to better link projects to marketing documents and employee time sheets.
- A new Time Sheet Report clearly displays the link between a project and time worked on the project by employee.
- Under Documents and Work Orders section, a new *Chargeable* tick box field indicates if a connected document line is chargeable to a customer.
- Additional project related information is added to the Activity form and users can also set an activity relevant for project billing.

Feature

- New Billing Document Generation Wizard allows users to recharge costs or bill a project.
- The billing wizard collects open document lines and billable items connected to the project for invoicing.
- Creates AR Delivery or AR Invoice documents based on the project data stored in the Project Management form.

Benefit

- Users have a holistic overview of projects and detailed information related to each project.
- Increases productivity and transparency.
- The billing wizard streamlines the standard billing or milestone billing process and helps improve efficiency.

Project Management (3/3)

Feature

- Access a Gantt Chart via context menu in Project window.
- The Gantt Chart visualizes the project as a whole.

Benefit

- More transparency, increased productivity, and enhanced usability.

Feature

- Supports Single Run Capacity which is the available daily capacity of a single resource unit, assuming a Production Order can only be produced on one resource unit at a time.
- Ability to calculate Single Run Capacity by including and/or excluding Daily Capacity Factors.
- Ability to set daily capacity basis using 'Set Internal Capacity to Single Run Capacity' which will allocate a default budgeted capacity of hours per day.
- Resource Capacity window will highlight the maximum daily single run capacity available.

Benefit

- Ability to differentiate between Daily Capacity and Single Run Capacity by including and/or excluding Daily Capacity Factors.
- Supports production orders that are only able to be produced on a single machine.
- Reflects the number of capacity resources a production order can consume on each working day.

Feature

- New routing function facilitates production processing through a defined sequence of production stages.
- A new *Routing Stage – Setup* window allows you to define Route Stages.
- Multiple routing stages are added into Production Order structures.
- Allows you to define the route sequence of any combination of Production Order line types.
- New *Priority* field allows you to manually enter a priority of the Production Order. The lower the number, the more important the Production Order.
- An ability to control stage start and end dates with a new *Routing Date Calculation* field to choose *On Start Date*, *On End Date*, *Start Date Forwards* or *End Date Backwards*. This can automatically calculate date dependences between route stages in the Production Order.
- The *Issue Components* window allows you to filter which manual Production Order component lines will be passed into the drawn document.

Production Routing & Bill of Materials

Bill of Materials

Feature

- Bill of Materials form has been redesigned to improve usability and support routing stages and sequencing.
- Multiple routing stages are added into Bill of Material structures.
- Allows you to define a route sequence of any combination of BOM line types.
- Change the order of and entire stage as a group.
- Add UDF's to the new row Type - Route Stage
- New columns on Bill of Materials Report – Route Sequence, Route Stage and Route Stage Description showing related stage information valid at the time of transaction.

Sort By: Delivery/Due Date

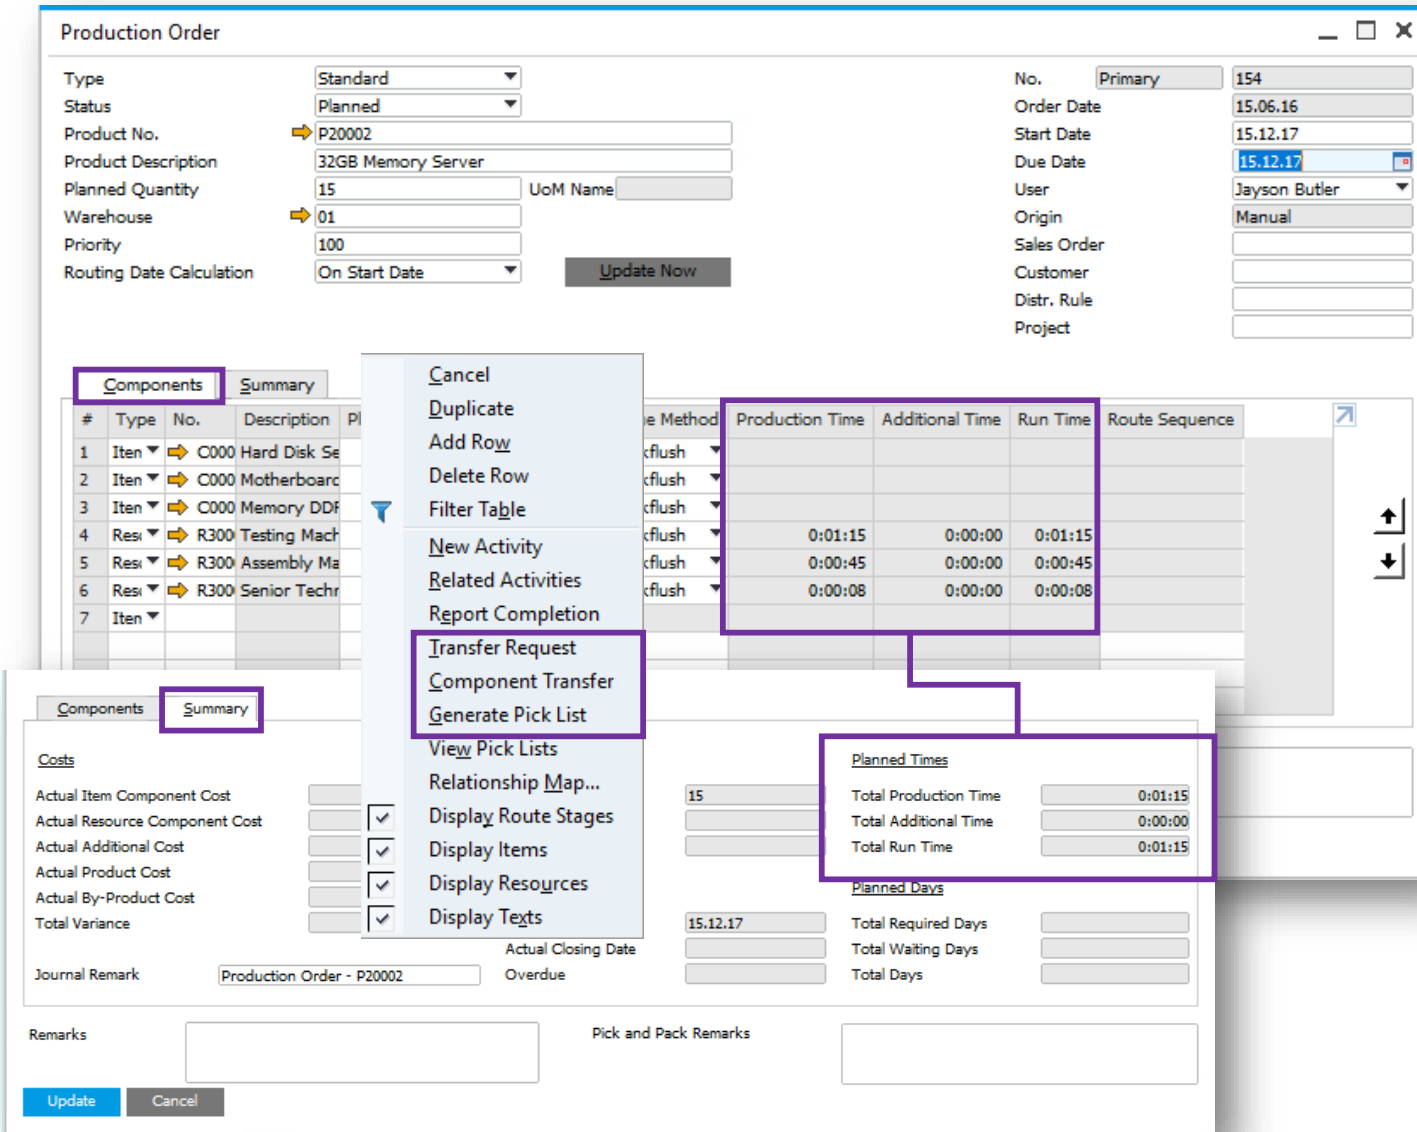

Feature

- The Pick & Pack Manager has been renamed to Pick Pack and Production Manager.
- New fields to the Open, Released and Picked Drawers make it usable as a simple Production Manager console, such as Route Stage, Route Sequence, Product No. and Production Priority.
- Filter your selection criteria by a number of Production Order attributes such as Start Date, Route Stage, Route Sequence and Production Priority.

Benefit

- Ability to plan, execute and manage basic route based production.
- A significant enhancement for all businesses with a light production requirement.
- Enables greater control over production-related item and resource component management.
- Provides an estimated understanding of when component demand may be required.

Production Routing

The screenshot displays the SAP Production Order interface. The top section shows order details: Type (Standard), Status (Planned), Product No. (P20002), Product Description (32GB Memory Server), Planned Quantity (15), Warehouse (01), Priority (100), and Routing Date Calculation (On Start Date). A right-hand pane shows order metadata: No. (Primary), 154; Order Date (15.06.16); Start Date (15.12.17); Due Date (15.12.17); User (Jayson Butler); Origin (Manual); Sales Order; Customer; Distr. Rule; Project.

The main table shows routing stages with columns: #, Type, No., Description, Production Method, Production Time, Additional Time, Run Time, and Route Sequence. A context menu is open over the table, listing actions such as Cancel, Duplicate, Add Row, Delete Row, Filter Table, New Activity, Related Activities, Report Completion, Transfer Request, Component Transfer, Generate Pick List, View Pick Lists, Relationship Map..., Display Route Stages, Display Items, Display Resources, and Display Texts.

Below the table, the 'Summary' tab is visible, showing 'Planned Times' and 'Planned Days' sections. The 'Planned Times' section includes: Total Production Time (0:01:15), Total Additional Time (0:00:00), and Total Run Time (0:01:15). The 'Planned Days' section includes: Total Required Days, Total Waiting Days, and Total Days.

At the bottom, there are 'Update' and 'Cancel' buttons, and a 'Remarks' field containing 'Production Order - P20002'.

Feature

- The existing *Run Time* column is renamed to *Production Time*.
- The existing *Total Time* column is renamed to *Run Time*.
- On the Summary tab, the *Total Time* field is renamed to *Total Run Time*.
- On the Summary tab, the *Total Run Time* field is renamed to *Total Production Time*.
- *Production Time*, *Additional Time* and *Run Time* on the Route Stage line are estimated according to the Resource with the longest Run Time of all Resource lines belonging to the stage.
- The Resource that takes most of the time determines the route stage duration.
- New selection criteria options added to the right-click operations of Production Order:
 - Transfer Request
 - Component Transfer
 - Generate Pick List

Remarks:

Update

System Message

Reduce "Planned Qty" to match "Issued Qty"?

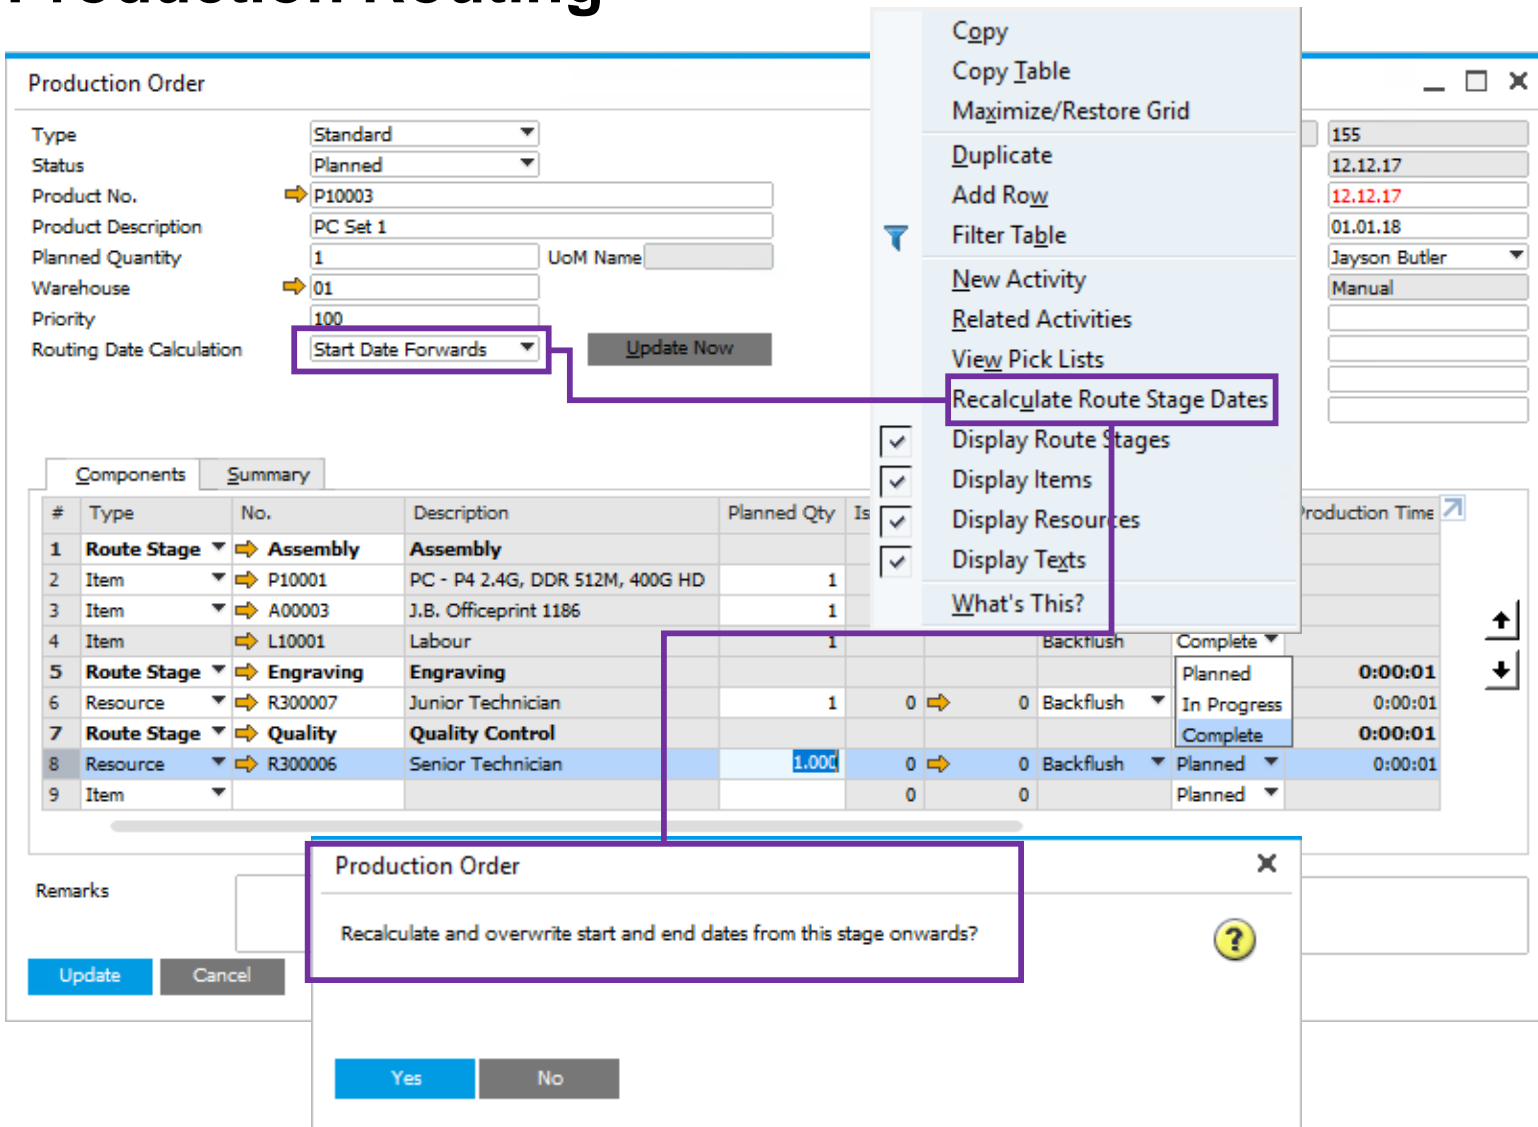

Remember My Answer and Do Not Show This Message Again

Yes No

Feature

- A new *Status* column is added to *Production Order* to set a line status for *Route Stage*, *Item* or *Resource* to *Planned*, *In Process* or *Complete*.
- The *Status* field is editable on all lines. The status of all component lines will be updated according to the status on the *Route Stage* line.
- When the line *Status* is changed to *Complete*, a check is performed across all line items and a system message appears asking the user to *Reduce Planned Qty* to match *Issued Qty*. The answer will be valid for all components.
- When a *Route Stage* is set to *Complete* it will not contribute any data to the algorithm which calculates the Routed Production Order Start Date Forwards/End Date Backwards behaviour

Production Routing

The screenshot displays the SAP Production Order routing interface. The 'Production Order' header shows details for a Standard, Planned order for product P10003 (PC Set 1) in warehouse 01. The 'Routing Date Calculation' is set to 'Start Date Forwards'. A context menu is open over the routing table, with 'Recalculate Route Stage Dates' highlighted. Below the table, a confirmation dialog asks: 'Recalculate and overwrite start and end dates from this stage onwards?'. The routing table includes stages for Assembly, Engraving, and Quality Control.

#	Type	No.	Description	Planned Qty	Is	Backflush	Complete	Production Time
1	Route Stage	Assembly	Assembly				Complete	
2	Item	P10001	PC - P4 2.4G, DDR 512M, 400G HD	1				
3	Item	A00003	J.B. Officeprint 1186	1				
4	Item	L10001	Labour	1				
5	Route Stage	Engraving	Engraving				Planned	0:00:01
6	Resource	R300007	Junior Technician	1	0	0	In Progress	0:00:01
7	Route Stage	Quality	Quality Control				Complete	0:00:01
8	Resource	R300006	Senior Technician	1.000	0	0	Planned	0:00:01
9	Item				0	0	Planned	

Feature

- A routed Production Order with the *Routing Date Calculation* set to *Start Date Forwards* or *Due Date Backwards*, provides a new right click option to *Recalculation Route Stage Dates*.
- A Yes/No message is displayed. If Yes is selected, the algorithm will only ripple forward or backwards from this line depending on the *Routing Date Calculation* setting.

Inventory Posting List

OK Cancel

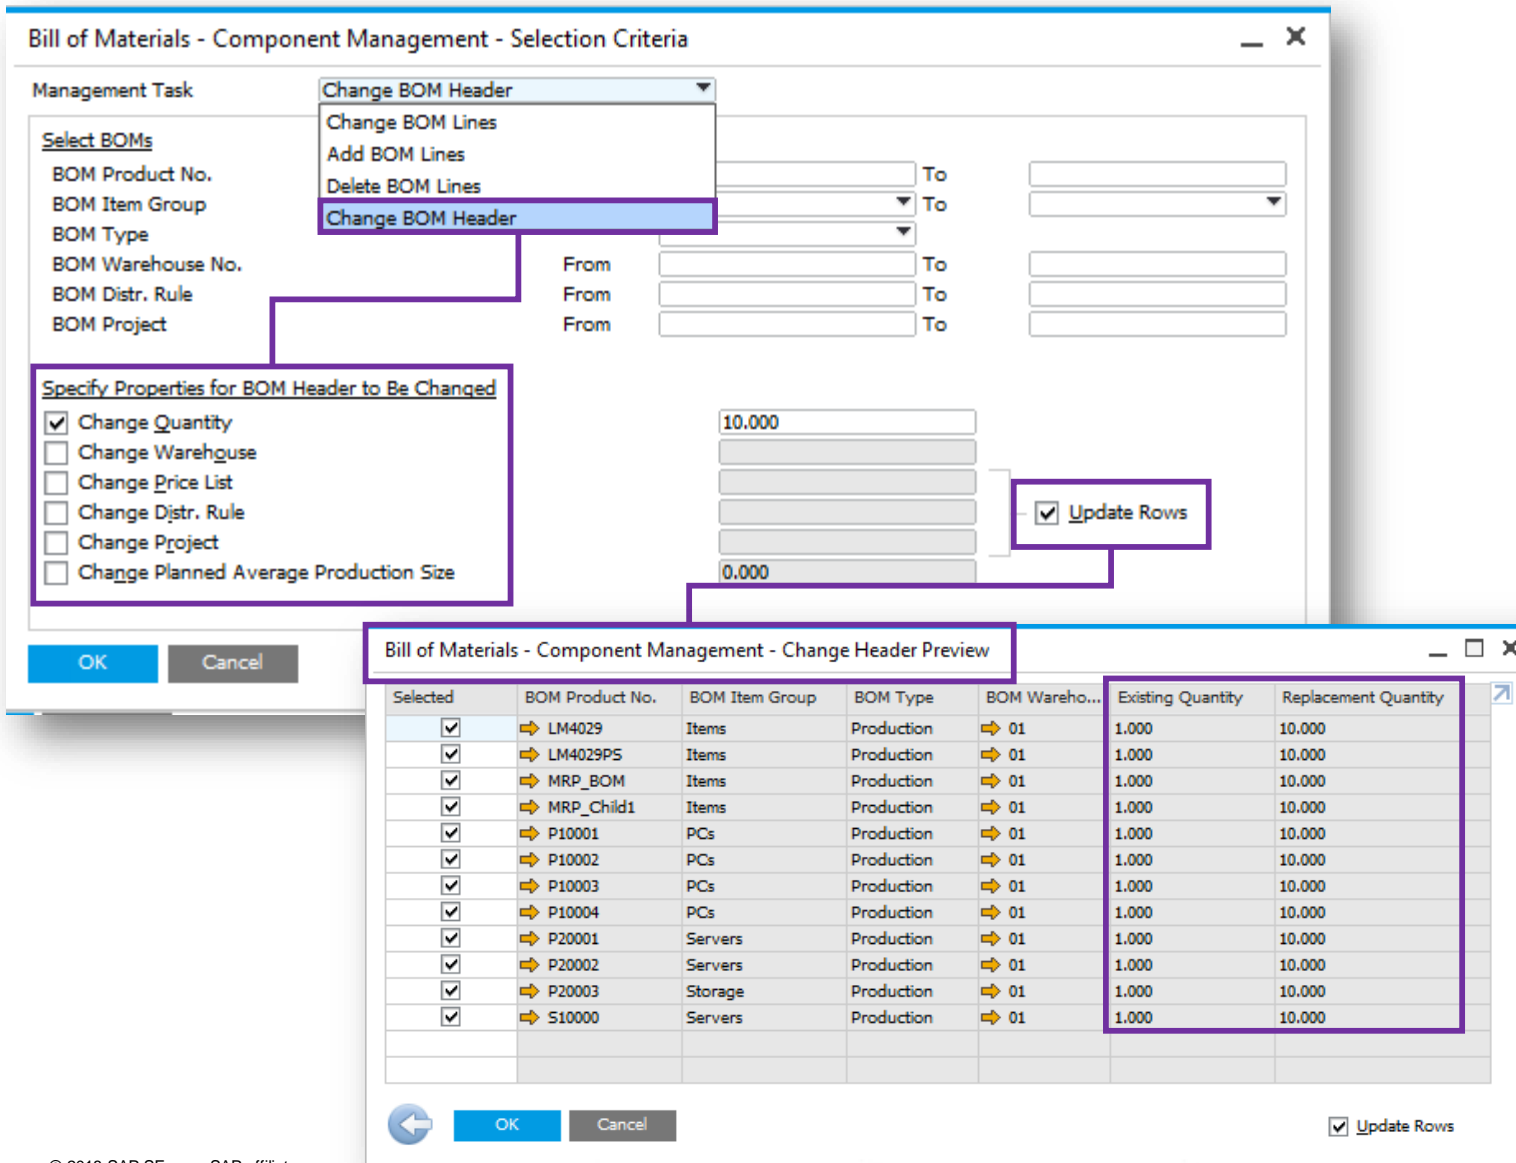

Feature

- The Right Click option on the Production Order with status *Released* will show the option *Inventory Posting List*.
- This option is also available on the Resource Master Data window showing the inventory posting list for specific resources.

Benefit

- Ability to view transactions for all item/resource components and products/by-products involved in the relevant production order process.

Bill of Material Component Management

Bill of Materials - Component Management - Selection Criteria

Management Task: **Change BOM Header**

Select BOMs:

- BOM Product No.
- BOM Item Group
- BOM Type
- BOM Warehouse No.
- BOM Distr. Rule
- BOM Project

Specify Properties for BOM Header to Be Changed:

- Change Quantity
- Change Warehouse
- Change Price List
- Change Distr. Rule
- Change Project
- Change Planned Average Production Size

Update Rows

Update Rows

Feature

- New Management Task – *Change BOM Header*
- New section *Specify Properties of BOM Header to be Changed* is added with the following options:
 - Change Quantity
 - Change Warehouse
 - Change Price List
 - Change Distr. Rule
 - Change Project
 - Change Planned Average Production size
- New *Update Rows* checkbox allows users to change and review the rows before execution.
- New *Change Header Preview* window allows users to review the BOM header properties to be changed before execution.

Change Additional Quantity

Change Warehouse

Change Issue Method

Change WIP Account

Change Route Sequence

Change Route Stage

Change Price List

Change Distr. Rule

Change Project

OK Cancel

Feature

- New section *Routed* shall be added to include filtering for:
 - Route Sequence (From - To)
 - Route Stage (From - To)
- Route Stage is a new option under Select BOM Lines giving you the ability to:
 - Delete route stage rows together with all components belonging to this route stage
 - Change Route Stage Code and Waiting Days for existing Route Stage.
- *Add BOM Lines* and *Change BOM Lines* management tasks now have the option to set and/or change *Price List*, *Distr. Rule* and *Project* details.
- *Change Route Sequence* and *Change Route Stage* are also new options when Routed is set to Yes and *Item*, *Resource* or *Text* is selected.

Benefit

- BOM Component Management now supports route stages.
- Increased flexibility when specifying properties for BOM lines to be changed for items and resources.

Variance Report for Production Orders

Production Order

Sales Analysis	Annual Sales Analysis (by Q...	Sales	Crystal	2017-07-14 13:08:25	

Feature

- Ability to publish and share documents via the Analytical Portal for:
 - Crystal Reports
 - MS Excel
- Access the Analytical Portal via this URL:
<https://<hana-server>:<Port>/Portal>
- Ability to access the Analytical Portal for every user but only authorized reports are being displayed
- The authorized documents can be downloaded or run in different formats:
 - MS Excel – PDF, Excel or HTML
 - Crystal Reports – PDF
- It is not necessary to have an SAP Business One Client or MS Excel installed on client side.
- The documents can be run on different devices such as a web client or mobile device.
- On Premise and On Demand users are supported.

Analytical Portal (2/2)

The screenshots illustrate the following features:

- Favourite Reports:** A dedicated tab for reports marked as favorites, such as 'Annual Sales Analysis (by Quarter)' and 'Sales Opportunities Report'.
- Report Configuration:** A detailed view for configuring a report, including:
 - Report Parameters:** Selection of format (PDF, Excel, HTML).
 - Frequency and Time Range:** Configuration of trigger task frequency (e.g., 1 week) and start/end times.
 - Keep History For:** Options to keep the last 20 records, always, or never.
 - Send Result by Email:** Fields for email recipient and CC.
- Report Running History:** A table providing an overview of report execution:

Report Name	Scheduled Task	Type	Run Time	Status	Parameter	Remarks	Action
Annual Sales Analysis (by Quarter)	Sales Analysis	Crystal	2017-07-14 1...	Success	Document Ty...	Generate rep...	Download, Refresh
Annual Sales Analysis (by Quarter)		Crystal	2017-07-14 1...	Success	Document Ty...		Download, Refresh

Feature

- Favorite Reports tab appears when a minimum of one report is marked as a favorite.
- Documents can be downloaded directly, or scheduled (daily, weekly, monthly) and sent via mail.
- Report runs (scheduled or manual) are saved in the Report History area:
 - Information like report name, type, start date time, run status etc. are listed.
 - The report result can be downloaded and viewed.
 - The maximum number of report results for each report scheduling task can be configured.

Benefit

- Provides an overview of scheduled reports and historical data.
- Documents can be scheduled and are available on different devices.

New Cockpit Templates 1/2

The screenshot shows the SAP Cockpit interface. At the top, a navigation bar contains various icons. Below it, a welcome message reads: "Welcome, Jayson Butler. You are in cockpit of OEC.Computers.UK." The main area displays a "Sales Process" flowchart with steps: Sales Quotation, Sales Order, Delivery, Return, A/R DP Invoice, A/R Invoice, A/R Credit Memo, Incoming Payments, Dunning Wizard, Customer, and Sales Reports. A "Select Templates" dialog box is open on the right, listing various templates with checkboxes and their visibility status.

Select Templates	
<input type="checkbox"/> Finance	Public
<input checked="" type="checkbox"/> Sales	Public
<input type="checkbox"/> Purchase	Public
<input type="checkbox"/> Inventory	Public
<input type="checkbox"/> My Sales Cockpit	Public
<input type="checkbox"/> Start Cockpit	Private

Below the flowchart, another screenshot shows a "by Sales Amount" bar chart with a context menu open. The menu options are "Update My Cockpit" and "Save As Template".

Feature

- New Cockpit Templates available for Finance, Sales, Purchase and Inventory
- Users can create own Cockpit Templates and set them as Public
- Selection of available Cockpit Templates via "Select Templates" button
- Choose the template which should be shown

Benefit

- Possibility to create different views
- More flexibility
- Create different Cockpit views for different roles or for test purposes

New Cockpit Templates 2/2

The image shows two overlapping SAP dialog boxes. The background window is 'Cockpit Management - Setup' with a table of cockpit templates. The foreground window is 'User Groups' with a 'Create Group' button and various input fields.

#	Name	Description	Create Date	Published By	Publication Date	Provider
1	Finance			SYSTEM		SAP
2	Sales			SYSTEM		SAP
3	Purchase			SYSTEM		SAP
4	Inventory			SYSTEM		SAP
6	My Sales Cock		05.07.17	manager	05.07.17	IT
11	Start Cockpit		19.07.17			
13						

User Groups Dialog:

- Buttons: Create Group, OK, Cancel
- Select Type: Authorization
- Name: Sales
- Description: Sales
- Group Type: Authorization
- Cockpit Template: Sales (dropdown menu open showing: Inventory, Purchase, Sales, Finance, My Sales Cockpit)
- Users table:

#	User Code	From	To
1	Kora		
2	Vicky		
3	brad		
4	john	John Peterson Logistic	
5	alex	Alex Torras	General
6			

Feature

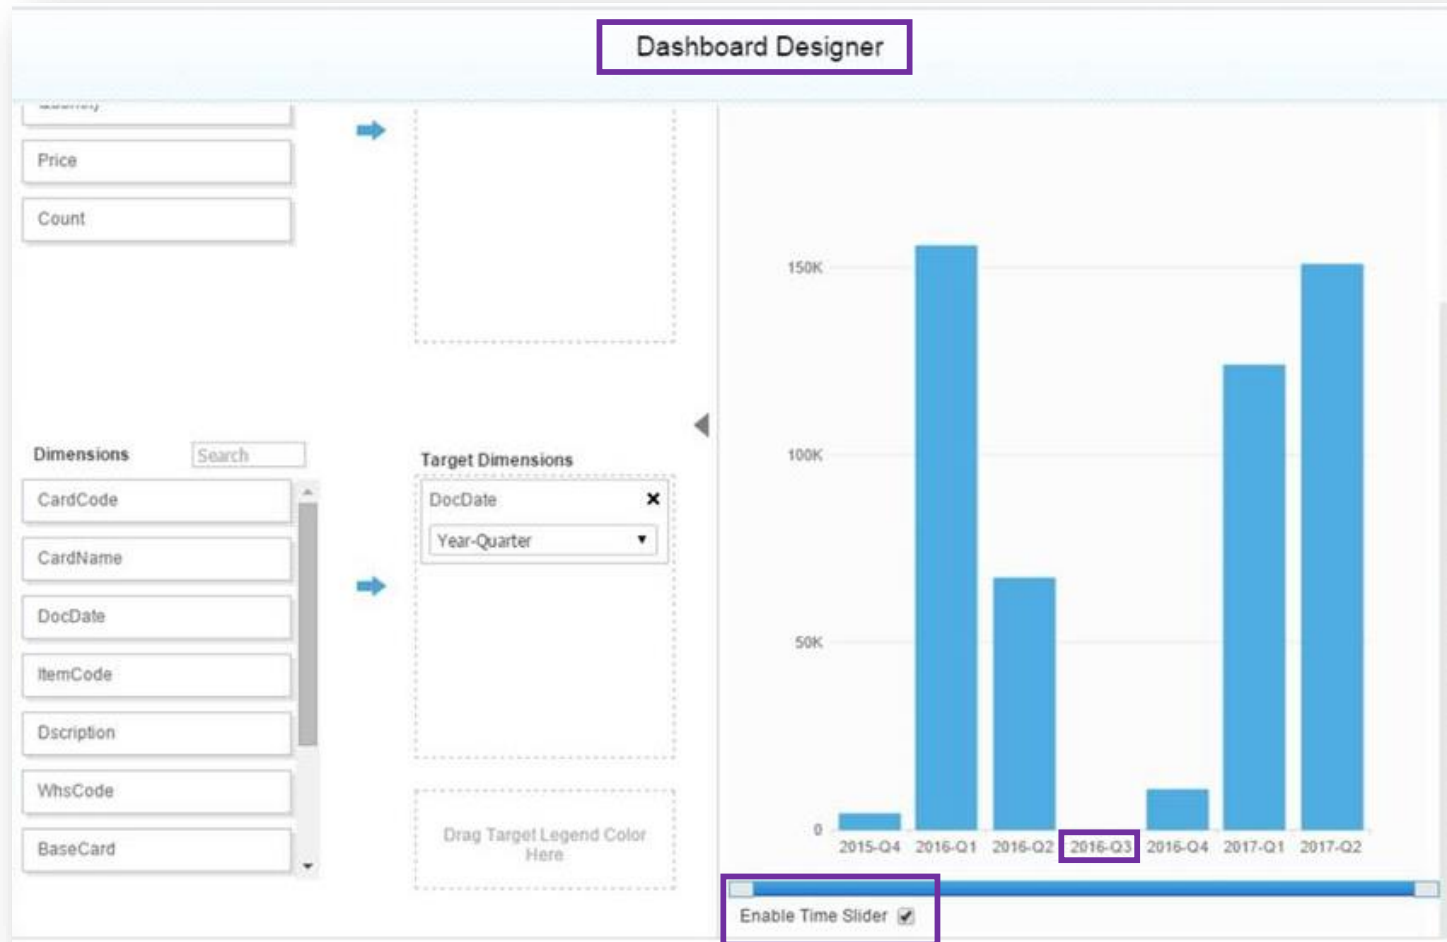

- Newly created Cockpit Templates can be published to all users
- To do this special authorization is necessary
- Cockpit template can be assigned by a power user to special user groups
- For each system authorization group a default Cockpit Template is available
- Only one template can be assigned to one default authorization group

Benefit

- Possibility to create different Cockpit views
- Central template management and assignment

Pervasive Analytics Dashboard Designer

Feature

- User can enable the Time Slider function.
- After enabling Time Slider, empty data records are shown in the Dashboard.
- Empty data records are shown as zero.

Benefit

- All units of time (day, month, week, year etc.) are shown in the Dashboard.
- Provides an overview of the whole time frame including records shown as zero with no interruption.

Feature

- Web-based management.
- Improved performance (response time) and stability.

Benefit

- Unified and centralized configuration in the System Landscape Directory.

Company Specific Mailer Configuration

The screenshot shows the 'General Settings' dialog box in SAP. The 'Enable Company Specific Mailer Configuration' section is highlighted with a red box. This section includes the following fields and options:

- Enable Company Specific Mailer Configuration
- SMTP Server: mail.oec.co.uk
- SMTP Port: 25
- Authentication: Plain Password
- User Name: mail@oec.co.uk
- Password: xxxxx
- Encoding: English (UK)
- Use TLS Encryption
- HTML Direction Right to Left
- Include Subject in Message Body

Other visible settings include 'At the Beginning of Each Session' (e.g., Perform Data Check, Open Exchange Rates Table), 'Internet Definitions' (e.g., Use Proxy Server for Web Connection), 'Default E-Mail Method' (SAP Business One Mailer selected), and 'Telephone No.' (Area Code, For External Line, Map Service).

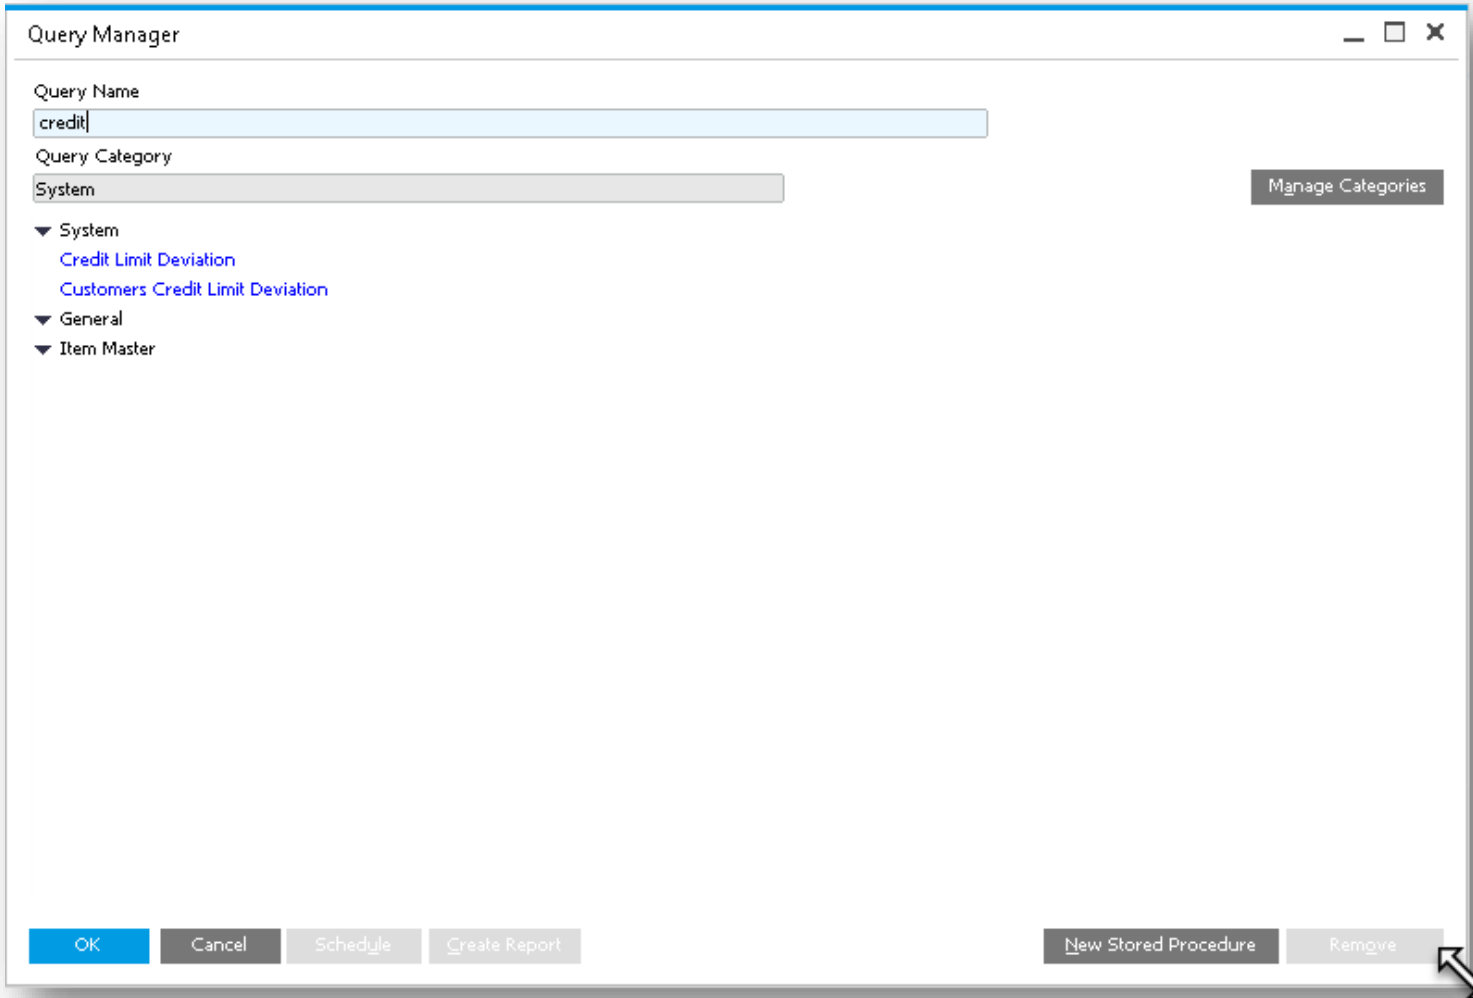

Feature

- Enable company specific mailer configuration.
- Switch between global company mailer configuration and company specific configuration.

Benefit

- Each tenant can have their own mail server in SAP Business One Cloud.

Query Manager UI Enhancements

Feature

- Filter the list of queries by query name.
- Expand the form to fit the results on your screen.

Benefit

- Fast access to queries.
- Full view of long query names and folders.

Using Extension Package Tool in Command Line Mode

```
Command Prompt
C:\Program Files (x86)\sap\SAP Business One SDK\Tools\ExtensionPackage>ExtensionPackage.exe /86:"C:\Users\I043582\Desktop\AddOn Source\DemoAddOn\bin\x86\Release\DemoAddOn.exe" /64:"C:\Users\I043582\Desktop\AddOn Source\DemoAddOn\bin\x64\Release\DemoAddOn.exe" /p:"C:\Users\I043582\Desktop\AddOn Deployment Package\DemoAddOn.zip" /s:"C:\Users\I043582\Desktop\AddOn Deployment Package\DemoAddOn.ard" /ex:".dll|.pdb|.manifest|.b1s"

C:\Program Files (x86)\sap\SAP Business One SDK\Tools\ExtensionPackage>

Info:C:\Users\I043582\Desktop\AddOn Deployment Package\DemoAddOn.zip already exists.The original file will be replaced.
Start packaging.
Packaged successfully.

C:\Program Files (x86)\sap\SAP Business One SDK\Tools\ExtensionPackage>.
```

Feature

- Generate lightweight extension package from command line

Benefit

- Automatization for solution packaging

ExtensionPackage.exe

/v: "1.3" (version of the Add-on solution)

/86: "..\DemoAddOn\bin\x86\Release\DemoAddOn.exe" (path to add-on 32 bit executable file)

Deploy Import

Feature

- Expose Semantic Layer Query Views to SL.
- Expose Semantic Layer as Service.

Benefit

- Semantic view service supports OData ver. 4
- The following query options are available :
\$filter, \$select, \$orderby, \$top, \$skip and \$count.
- Parameters can be used.

Platform | Extensibility

Feature	Description
EFM Enhancement	Porting from C# to JAVA to support electronic invoices in service layer (Portugal only). 
SAP Business One Studio	SAP Business One Studio supports Visual Studio 2015 and TFS (Team Foundation Server) 2015.
X-App Supports SSO for Service Layer	X-Apps can make calls to Service Layer without requiring the end user login again. 
UI-API Lost Focus-Get Focus Improvements	Improved performance of grids when updating calculation fields
Support XML methods for SAPbouiCOM.DBDataSource	Fast data retrieve and manipulation on DBDataSource.
Service Layer as a Service*	A new service on the Service Layer platform which exposes semantic layer views in OData format. * Planned for later patch level in SAP Business One 9.3, version for SAP HANA 
Optimized Login Connection	Connect method optimization
Internal Reconciliation is exposed in DI API and Service Layer	The feature is presented as a new CompanyService object. Generally, it can get, cancel and add reconciliation entries.
Manage Electronic Document Monitor from DI API	The feature is presented as a new CompanyService object. It can get, add, delete and update the Electronical Documents. It has a feature to manipulate with the Electronical Documents logs.
User Defined Field extension	The User Defined Field's Link to System Object section had been extended with 20 additional objects, like Bill of Materials, Opportunity, Activities, Banks and Users.

Lifecycle Management

SAP Business One 9.3

Centralized Deployment

The screenshot displays the SAP System Landscape Directory (SLD) interface. The main window shows a table of Logical Machines (4) with columns for Alias, Machine Status, Version, CPU Utilization, Memory Utilization, Description, Agent Status, SLD Agent Version, and Log. Two machines are selected: 10.55.179.125 and 10.55.178.54. A 'Select Components' dialog box is open, showing a table of components to be installed on these machines. The components include 'SAP Business One Client' and 'Data Interface API' for both IP addresses. A 'Review' dialog box is also open, showing the installation parameters and selected features for the components.

Name	Installed Version	New Version	Action
Implementation tools			
<input checked="" type="checkbox"/>	SAP Business One Client		
<input checked="" type="checkbox"/>	10.55.179.125	9.30.000 PL00	INSTALL
<input checked="" type="checkbox"/>	10.55.178.54	9.30.000 PL00	INSTALL
SAP Business One Client (64bit)			
<input type="checkbox"/>	10.55.179.125		
<input type="checkbox"/>	10.55.178.54		
Data Interface API			
<input checked="" type="checkbox"/>	10.55.179.125		
<input checked="" type="checkbox"/>	10.55.178.54		

Parameter	Value
Installation	
Installation folder (32-bit)	C:\Program Files (x86)\SAP
Selected Features [10.55.178.54]	
Implementation tools - SAP Business One Client	B1Client
Implementation tools - Data Interface API	B1DIAPI
Selected Features [10.55.179.125]	
Implementation tools - SAP Business One Client	B1Client
Implementation tools - Data Interface API	B1DIAPI

Feature

- Register MS Windows and SUSE Linux machines of a company
- Remotely install and use the SLD agent for various operations, such as:
 - Creating Server Repository (SBO-COMMON)
 - Installing SAP Business One Client remotely
 - Adding Demo Databases
 - Upgrading SAP Business One Database

Benefit

- Comprehensive and direct management of the company landscape at hand
- Save time in implementation tasks

Embedded Incident Management

Recorded Steps

This file contains all the steps and information that was recorded to help you describe the recorded steps to others. Before sharing this file, you should verify the following:

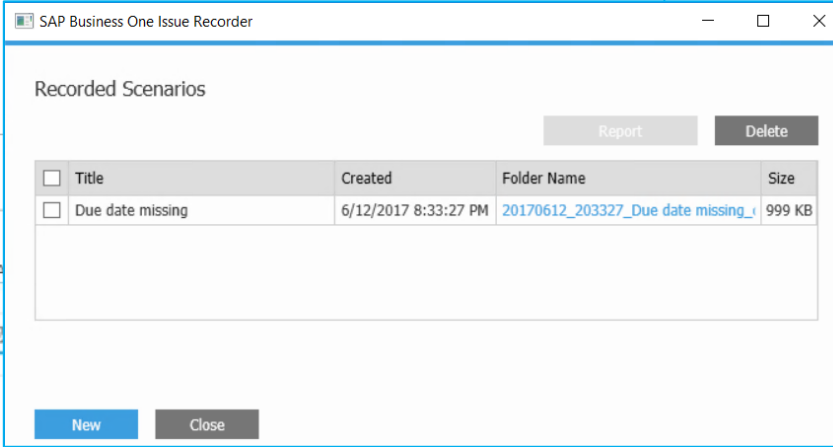

- The steps below accurately describe the recording.
- There is no information below or on any screenshots that you do not want others to see.

Passwords or any other text you typed were not recorded, except for function and shortcut keys that you used. You can do the following:

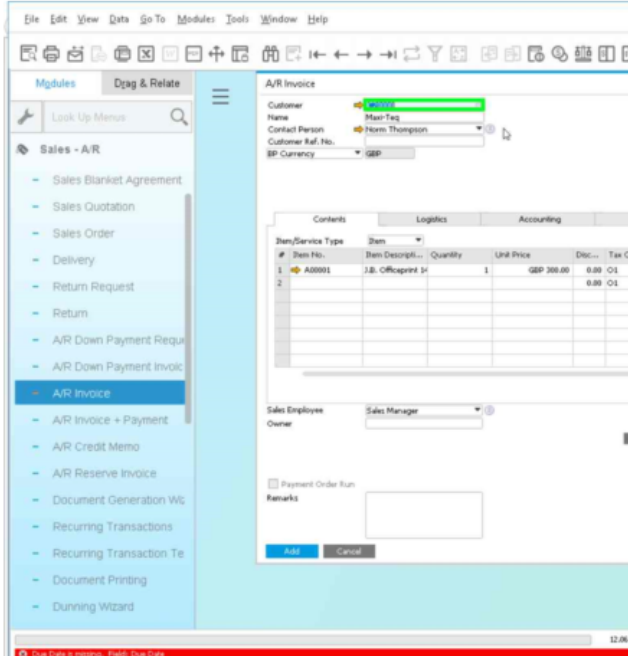

- Review the recorded steps
- Review the recorded steps as a slide show
- Review the additional details

Steps

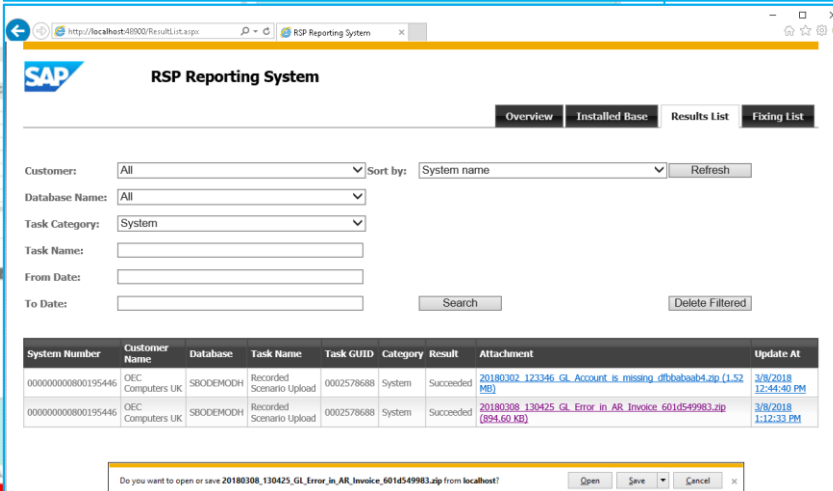

Step 1: (6/12/2017 8:37:15 PM) User keyboard input on "A/R Invoice (window)" in "SA

Title	Created	Folder Name	Size

000000000800195446	CEC Computers UK	SBODEM00H	Recorded Scenario Upload	0002578688	System	Succeeded	20180308_130425_GL_Error_in_AR_Invoice_601d549983.zip (894.60 KB)	3/8/2018 1:12:33 PM

Feature

- Instantly record a problem inside SAP Business One Client
- Document all taken steps as screenshots with text
- Submit report including issue description and file path to Partner WebDAV by the Remote Support Platform Task 2578688 (PL03)

Benefit

- Provides accurate issue description to SAP Partner
- Reports problems internally to get direct support from colleagues within the company

Remote Support Platform 3.2

The screenshot displays the Remote Support Platform for SAP Business One interface. A 'Backup Strategy Settings' dialog box is open, showing the following configuration:

- Instance Backup: Daily
- Time: 10 : 10 :00
- Backup Service is available: <https://sid-hdb:40000/BackupService/>
- Additional Options:
 - Delete Older Backups After Successful Instance Backup
 - Perform Company Schema Consistency Check Prior to Backup
 - Check Only Productive Schemas
- Buttons: Trigger Instance Backup Now, OK, Cancel

The main interface shows the 'Content Upload' section with a table of requests:

GUID	Request Name	Incident No.	Progress	
9030173834		0020751295-48985-2017	N/A	To Be Started
9067210730		0020751295-48985-2017	N/A	To Be Started
9014302285		0020751295-48985-2017	N/A	To Be Started
9047216337		0020751295-48985-2017	N/A	To Be Started
9062317998		0020751295-48985-2017	N/A	To Be Started
9020394987		0020751295-48985-2017	N/A	To Be Started
9082144334		0020751295-48985-2017	N/A	To Be Started

The 'Software Updates' section shows a table of updates:

Component	New Version	SAP Note	Progress	
Remote support platform for SAP Business One				
Remote support platform for SAP Business One	3.2 SPO0 PL08	2448324	100,00%	Upgraded
SAP Business One 9.0 Release Family				
SAP Business One 9.2	9.2 PL6 Update patch	2349500	100,00%	Downloaded

Latest Features

- Schema Consistency Check enforcement to Instance Backup feature
 - RSP Task 2315090 performs SAP HANA schema consistency checks described in SAP Note [2116157](#)
 - Ability to run on productive databases only
 - Ability to get email notification about status change
- Simplified Content Upload Requests (CUR) for upload of GoToAssist recordings
 - No need to email the Content Upload request and encryption key.

Benefits

- Consistency check strategy
- Quicker and more effective support

Note: As of SAP Business One 9.3, RSP's versioning is de-coupled from SAP Business One's versioning. RSP 3.2 patches will be delivered together with SAP Business One 9.3, thus allowing a flexible software delivery of RSP.

Thank you.
