This presentation is not subject to your license agreement or any other service or subscription agreement with SAP. SAP has no obligation to pursue any course of business outlined in this document or any related presentation, or to develop or release any functionality mentioned therein. This document, or any related presentation, and SAP's strategy and possible future developments, products, and platforms, directions, and functionality are all subject to change and may be changed by SAP at any time for any reason without notice. The information in this document is not a commitment, promise, or legal obligation to deliver any material, code, or functionality. This document is provided without a warranty of any kind, either express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose, or noninfringement. This document is for informational purposes and may not be incorporated into a contract. SAP assumes no responsibility for errors or omissions in this document, except if such damages were caused by SAP's willful misconduct or gross negligence.

All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates, and they should not be relied upon in making purchasing decisions.

For all recent and planned innovations, potential data protection and privacy features include simplified deletion of personal data, reporting of personal data to an identified data subject, restricted access to personal data, masking of personal data, read access logging to special categories of personal data, change logging of personal data, and consent management mechanisms.

About the SAP Business One road map

In the **road map for the SAP Business One solution** you can learn about SAP innovations along four different timelines:

1. [Recent innovations](#) for SAP Business One that have been launched in the past weeks or months and can already be purchased
2. [Product vision](#), providing a high-level and long-term business perspective on innovations for SAP Business One
3. [Product direction](#), providing a long-term perspective on high-level development plans for innovations—inspired by your requirements
4. [Planned innovations](#) for SAP Business One that are intended to be launched in the short term or midterm

Our purpose

**Help the world
run better
and improve
people's lives**

We bring out the best in every business

Our vision

SAP's best-selling ERP solution by number of customers

82,000+
customers

with **1.2+** million users

500+
partner solutions

delivered by
~**300** partners

50
country localizations

and **28** languages per
customer's choice

7,000+
subsidiaries

running the product for
360+ large enterprises

850+
partners worldwide

implementing and
servicing customers

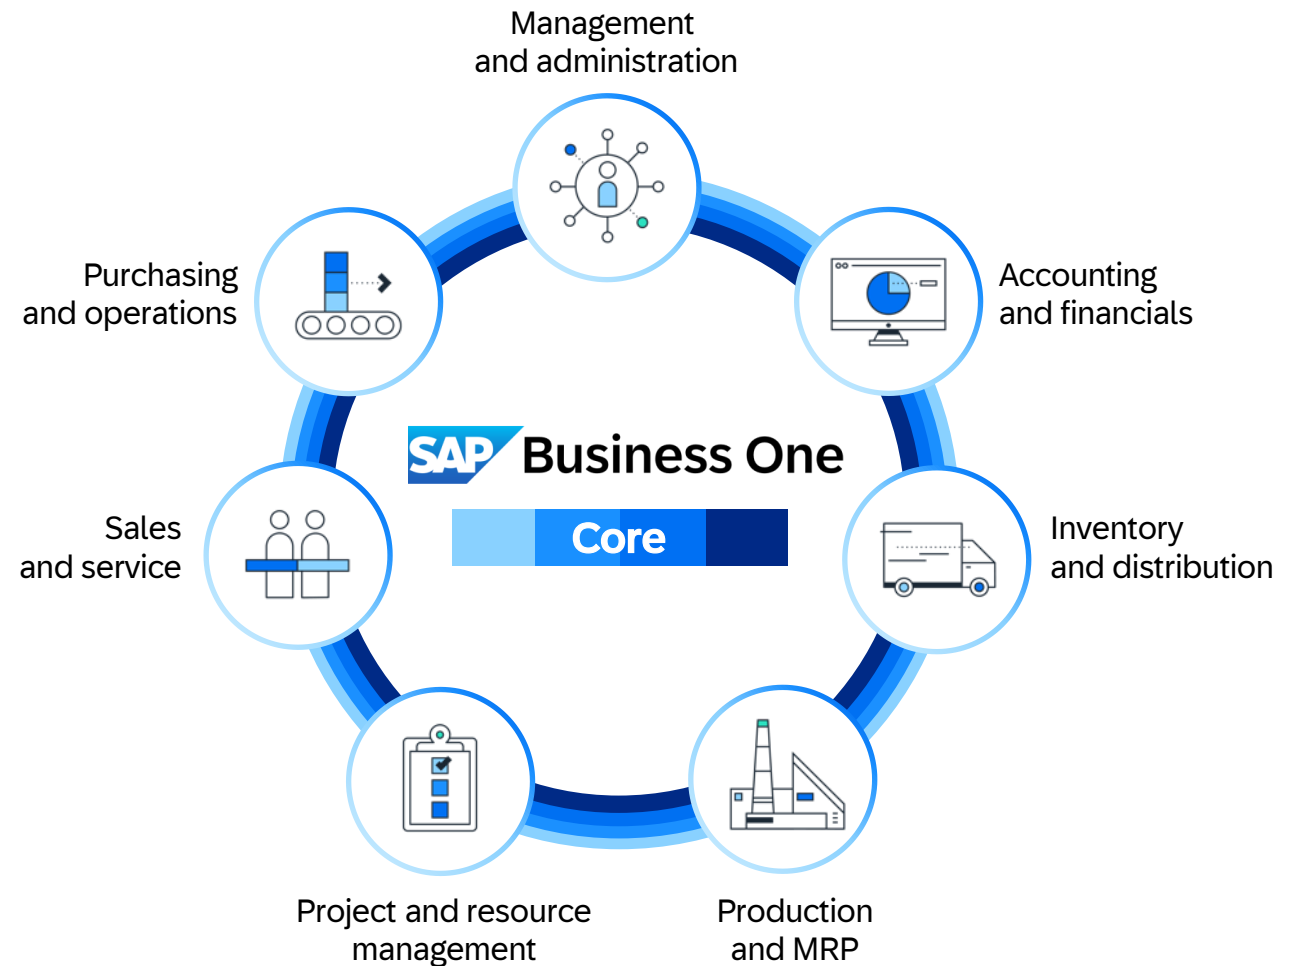

170+
countries

with customers
and partners

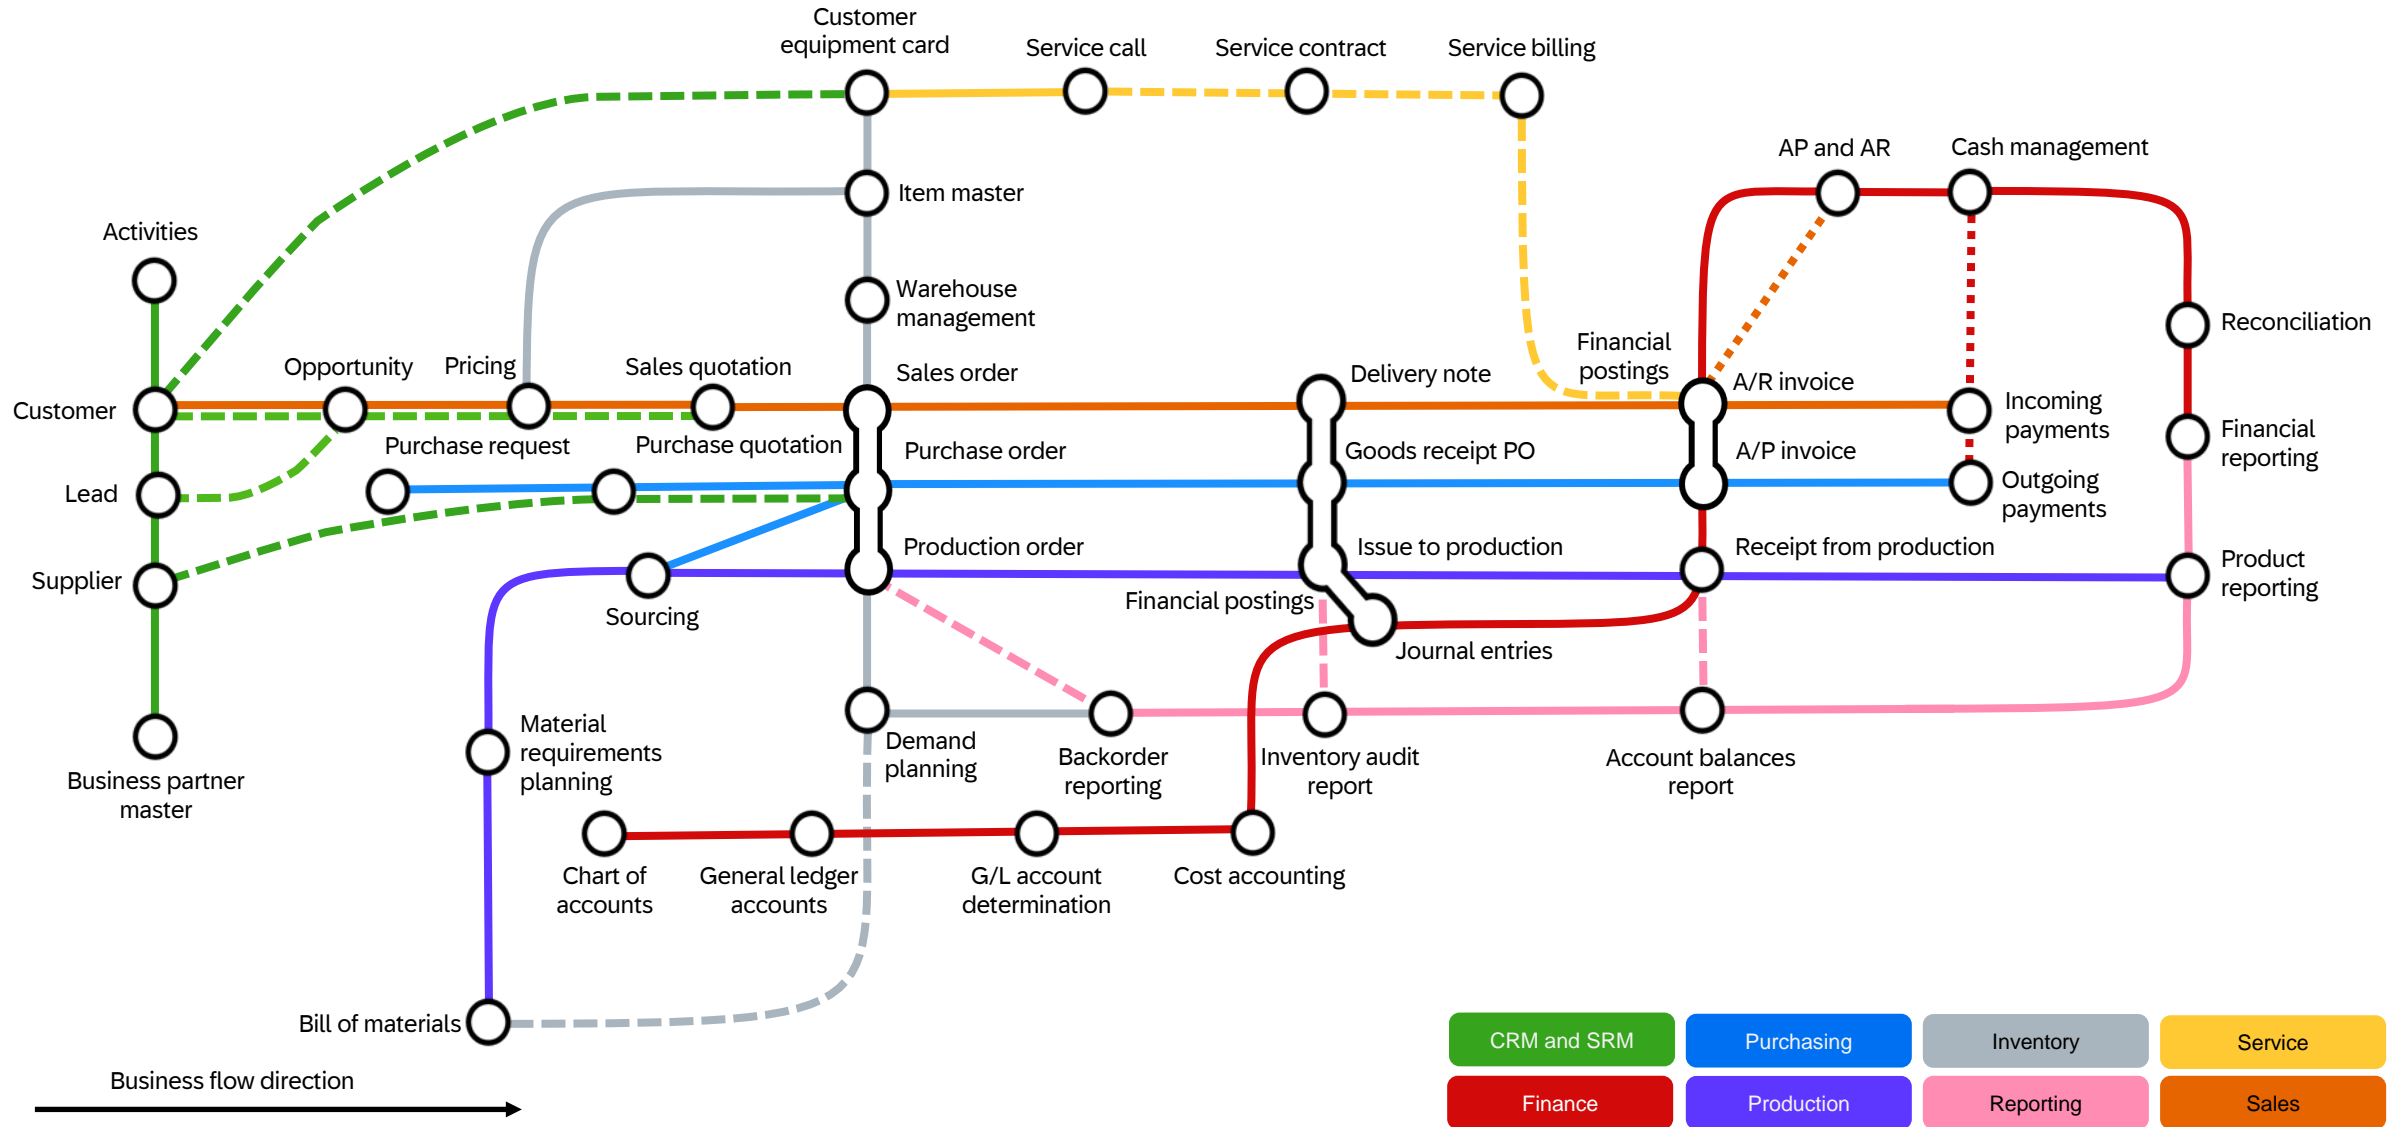

SAP Business One: Strong ERP core for SMEs designed to ease extending and complementing

Digital enablers (enrich and extend the core):

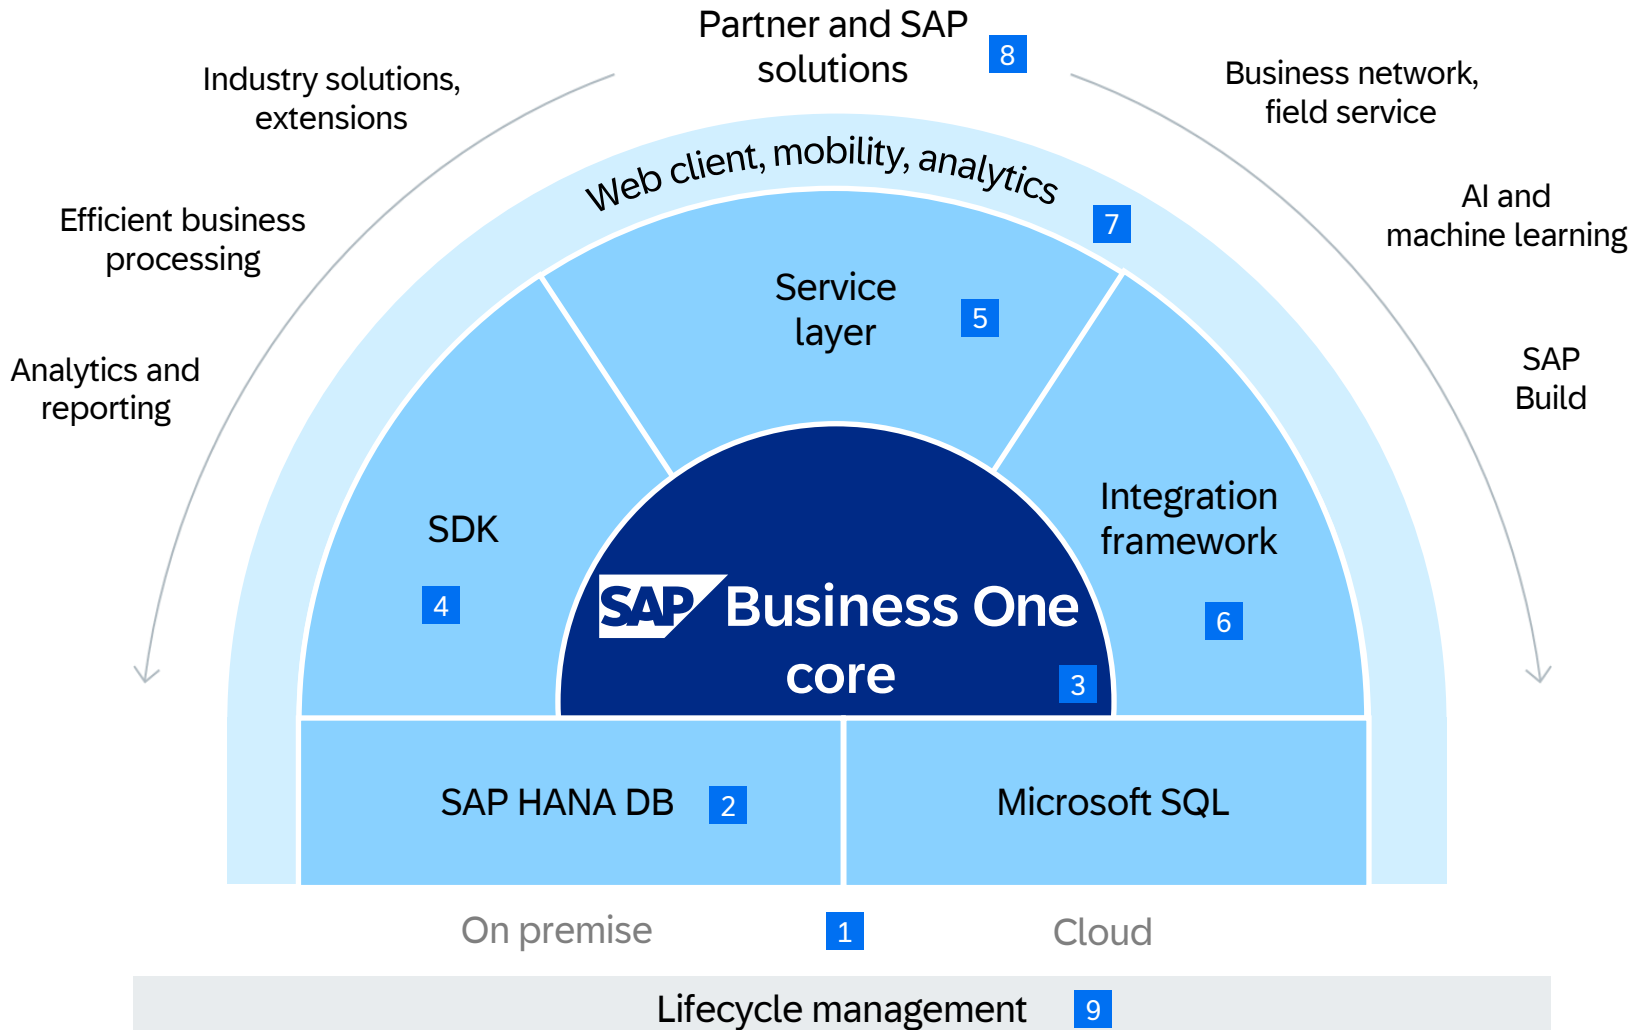

- AI and machine learning
- SAP Business Technology Platform (SAP BTP) cloud services
- Analytics
- Mobile technologies

SAP Business One process metro map

SAP Business One solution

Cost

- 9 Low cost of ownership and efficient support + cloud control center

Usability

- 7 Web client
- 7 Modern front end and analytics

Comprehensive business scope

- 3 All standard business processes covered
- 8 Extending the solution scope based on extensibility layer
- 6 Robust integration and collaboration relying on service layer and software development kit (SDK)
- 4 Basic application programming interfaces (APIs)

State-of-the-art technology

- 2 Running on in-memory technology
- 5 Interface for SAP HANA and Microsoft SQL applications
- 1 Full deployment flexibility

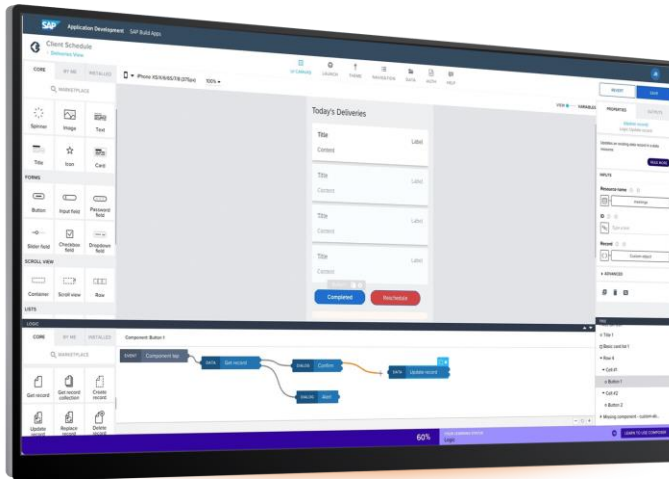

SAP Build

Create enterprise apps, automate processes, design business sites with drag-and-drop simplicity

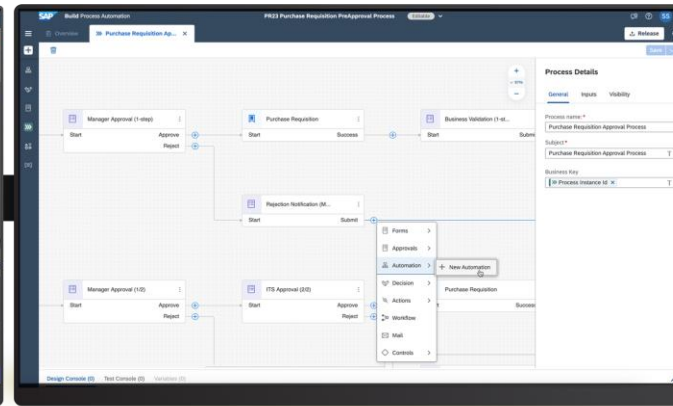

Compose apps

Automate processes

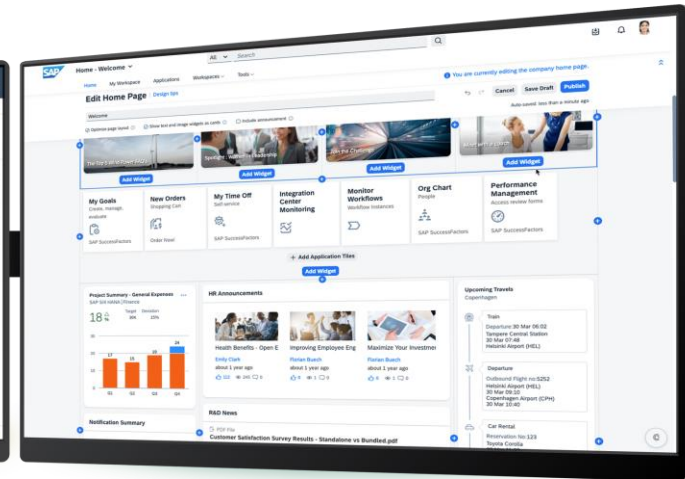

Design business sites

SAP Build Apps

SAP Build Process Automation

SAP Build Work Zone

Build visually
Integrate smoothly
Collaborate securely

SAP Business Technology Platform

SAP Business Technology Platform brings together application development, data and analytics, integration, and AI capabilities into one unified environment optimized for SAP applications.

SAP Business One used in more than 170 countries

Master the challenge of globalization in your business

Supported localizations (50)

Argentina	Finland	Mexico	Slovakia
Australia	France	Netherlands	South Africa
Austria	Germany	New Zealand	South Korea
Belgium	Greece	Norway	Spain
Brazil	Guatemala	Oman	Sweden
Canada	Hong Kong, China	Panama	Switzerland
Chile	Hungary	Poland	Turkey
China	India	Portugal	Ukraine
Costa Rica	Ireland	Puerto Rico	United Arab Emirates
Cyprus	Israel	Qatar	United Kingdom
Czech Republic	Italy	Russia	United States
Denmark	Japan	Saudi Arabia	
Egypt	Lebanon	Singapore	

Countries making use of localizations

Customers in more than 120 countries use localization of other countries, own customization, or a partner solution.

Supported system languages (28):*

Arabic, Chinese (simplified and traditional), Czech, Danish, Dutch, English (UK and U.S.), Finnish, French, German, Greek, Hebrew, Hungarian, Italian, Japanese, Korean, Norwegian, Polish, Portuguese (Brazil), Portuguese, Russian, Slovak, Spanish (Latin America), Spanish, Swedish, Turkish, and Ukrainian

*A convenient option for making additional languages available is using a partner solution (for some countries bundled with functional add-ons) or to define customer-specific UI terms using the custom language tool as detailed in SAP Note [1757764](#).

Recent innovations

SAP Business One, Web client: The best of all worlds

Web client benefits

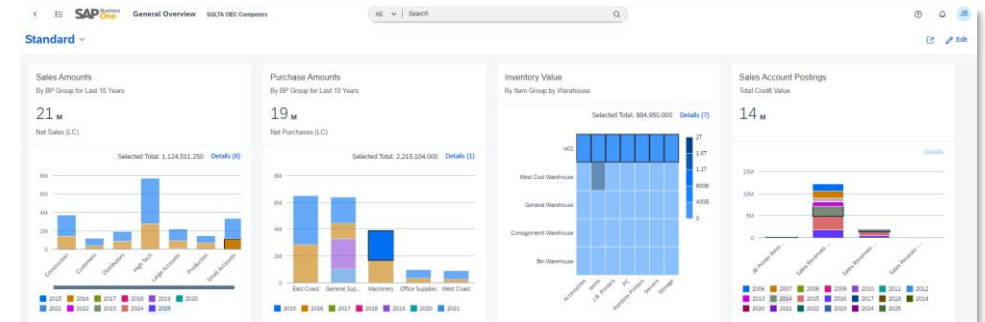

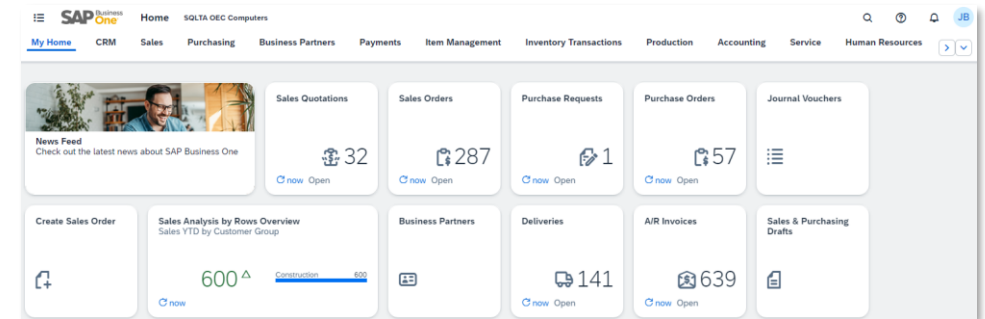

- Supports smooth working with SAP Business One using native web browser
- Offers the core business logic and processes in a new user experience based on the SAP Fiori design system
- Reads and writes from and to the same company database used with SAP Business One

Business processes coverage

- Company configuration framework
- Sales and purchasing documents
- CRM, service, and timesheet
- Payments
- Basic finance (chart of accounts, journal entries, posting templates, and recurring postings)
- Items and business partners master data
- Inventory transactions (goods issue and receipt, stock counting, inventory transfer) and bills of materials
- Document drafts and approval process
- Sophisticated analytics capabilities

Integration and extensibility

- Microsoft 365 OneDrive export (Excel, Word)
- Collaboration using Microsoft Teams
- E-mail using Microsoft Outlook 365
- User-defined fields, tables, and objects
- Web client user interface API (UI API)
- User-defined values: Arithmetic and logical formula
- SAP Companion service (web assistant) adoption

SAP Business One, Web client: Analytics

Powerful analytics at the tip of your fingers

List view: Object-centered analytics

Use sophisticated filtering (including date offset) and visualization (including date aggregation) capabilities for deriving and presenting the data you need in every object list view

General overview: Gather multiple data sources

Design cards based on any list view, analytical chart, user-defined object (UDO), user-defined table (UDT), or user-defined query (UDQ), showing the data you need from various aspects

User-defined queries

Manage, create, edit, and preview UDQs; presented as standard list view and can be leveraged as a data source for cards on general overview

Linked views: Contextual analytics

Assign any view, general overview, or UDQ to any object header and line level to derive record-specific data

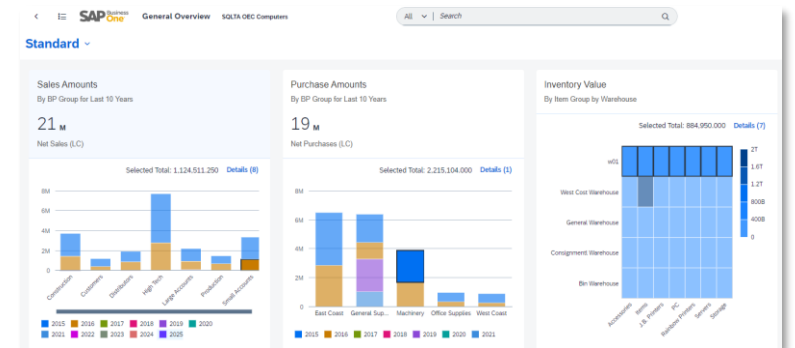

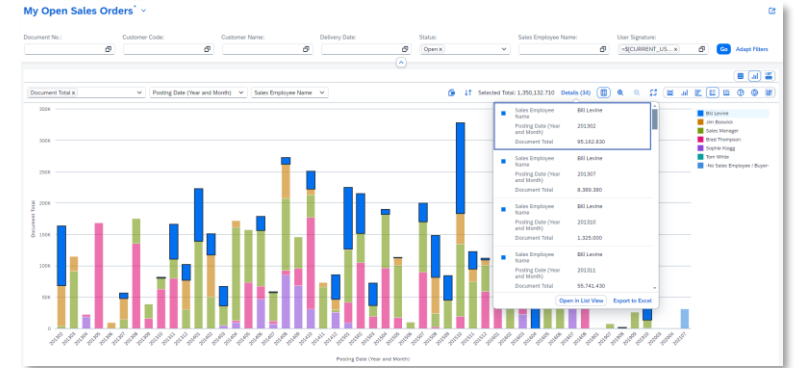

Export and import views: Collaborate across companies

Export selected views (and links) to a file that can be imported into other company databases

Share by e-mail: Collaborate among users

Embed a direct link to any view, general overview, or UDQ in e-mail body and send to your colleagues

#	Name	Description	Type	Aggregation	Decimal Places	Link To	Match Unique ID With	Original
1	CardName	BP Name	Dimension	Name	Name		<input checked="" type="checkbox"/>	CEM_CardName
2	ObjType	Object Type	Dimension	Name	Name		<input checked="" type="checkbox"/>	CEM_ObjType
3	EMailAddr	E-Mail Address	Dimension	Name	Name		<input checked="" type="checkbox"/>	CEM_EmailAddr
4	SendDate	Send Date	Dimension	Name	Name		<input checked="" type="checkbox"/>	CEM_SendDate
5	SendTime	Time Sent	Dimension	Name	Name		<input checked="" type="checkbox"/>	CEM_SendTime
6	U_NAME	User Name	Dimension	Name	Name		<input checked="" type="checkbox"/>	CEM_U_NAME

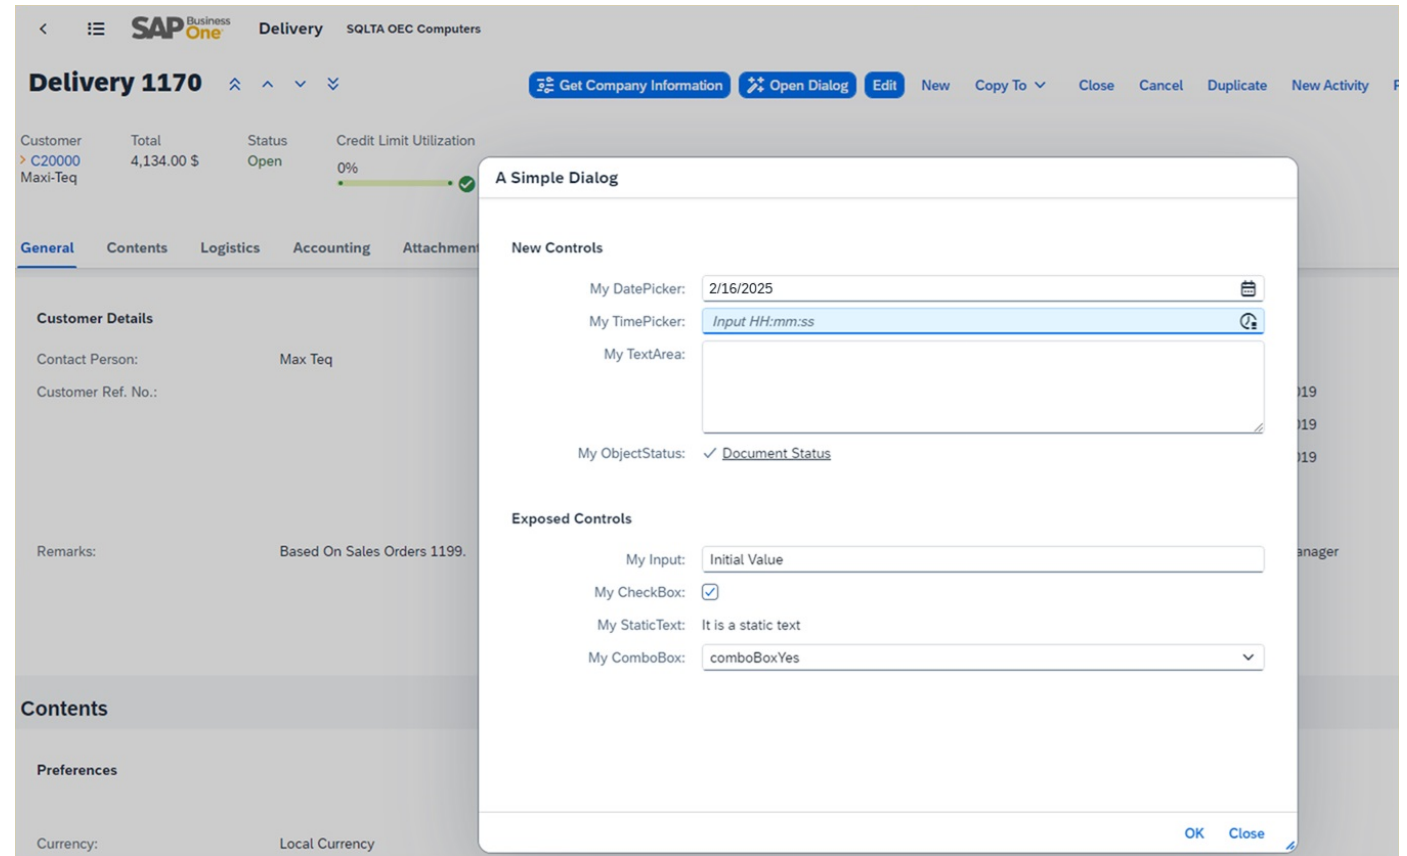

SAP Business One, Web client: UI API framework

UI API framework

- Ability to customize Web client views
- Support for UI controls:
 - Dialog view, date and time picker, and more
- Support for events
- Samples and online help

Develop using VS Code IDE

- Creation of a project in VS Code
- Selecting the relevant views to extend
- Previewing the relevant changes
- Debugging
- Packaging and deployment using the extension manager
- Support for TypeScript
- Support for additional views, such as item master data and more

Identity and authentication management

- SAP Business One supports the identity and authentication management service, allowing users to authenticate with their identity provider (IdP) user when signing in to SAP Business One in on-premises and cloud (using cloud control center) deployments.
- Two-factor authentication (2FA) can also be enabled for an extra layer of security, helping to protect user accounts against unauthorized access.

The latest enhancements in identity and authentication management

- Principal propagation (SAP BTP use case)
- Verifying user presence for newly added and existing Active Directory Domain Services (AD DS) users
- Selecting the support user for binding
- Searching user code when binding a user
- Defining password blacklist
- Bypassing single sign-on (SSO) by updating a registry key
- Technical user authentication

On-premises

Artificial intelligence and automation

Extensibility readiness for adoption of AI services

Artificial intelligence: AI services and tools from SAP

- **Document Information Extraction** service and available integration to SAP Business One—SAP AI Service running on SAP BTP and leveraging machine learning to streamline processing of invoices from vendors
- **SAP Build Process Automation**—a solution helping customers maintain their edge and free employees from repetitive and error-prone tasks (seven automation best-practice templates available to be used with SAP Business One)
- **AI Foundation on SAP BTP**—a complete set of services for AI developers to build robust AI-driven extensions and applications

Artificial intelligence: Solutions from SAP partners

- SAP Business One extensibility is ready for adoption of AI services—enabling partners to create and innovate with AI services and most recent AI agents and develop own extensions and applications leveraging the latest generative AI technology.
- Partners are making use of SAP BTP tools for the solution development.
- Each customer has the freedom to choose the appropriate solution to meet that customer's needs.

SAP Business One 10.0: Key highlights up to feature package (FP) 2502 (1/6)

Web client

Document support

- Sales documents: Quotations, orders, deliveries, returns, return requests, A/R invoices, A/R reserve invoices, and A/R credit memos
- Purchasing documents: Purchase requests, quotations, orders, goods receipt POs, goods returns, goods return requests, A/P invoices, A/P reserve invoices, and A/P credit memos
- Inventory documents: Goods issues, goods receipts, inventory counting, and inventory transfer

Analytics enhancements

- Advanced analytics content and editor incl. import and export views
- User-defined queries
- Linked list views

Technological enhancements

- Enterprise search: Supported on SAP HANA
- Support for single sign-on

Functionality

- Company configuration framework
- Outgoing and incoming SnB/bin location selection
- Service calls and solution knowledge base
- Relationship map
- Document opening and closing remarks
- Approval process and drafts incl. approvers
- Business partner (BP) and item master data
- BP catalog number and bar code
- Multiple branches
- Freight charges
- Exchange rate entry
- Authorizations and data ownership
- Incoming and outgoing payments
- Opportunities, activities, and notifications
- Bill of materials (BOM)
- Journal entry and chart of accounts
- Recurring journal entries and journal entry templates
- Equipment card and service contract
- Alternative items
- Timesheet
- Packing slip

Usability enhancements

- Customizable home page
- Flexible list views
- Special lines in marketing documents
- Reference documents
- Predefined texts
- 28 display languages
- Message preferences
- High-contrast UI theme and Horizon theme
- Attachment management
- SAP Companion adoption
- Microsoft 365 integration to OneDrive (Excel, Word)
- Outlook 365 integration
- Business-card scanning with Document Information Extraction service
- KPIs display in user-defined tiles
- Support for APIs for new views
- Support for “Display in menu” setting for UDTs
- User-defined fields, tables, and objects
- User-defined values: Arithmetic or logical formula
- VS Code plug-ins (URL mashup, apps), iFrame as a tile support
- Web UI API

SAP Business One 10.0: Key highlights up to FP 2502 (2/6)

Localizations | Legal compliance

Accounting

- Journal entries series for the period-end closing/exchange rate difference and conversion differences transactions

Banking

- Bank statement processing (BSP) enhancements

Electronic invoicing

- EU Peppol electronic invoicing support
- XRechnung e-invoices for Germany
- Electronic Invoice for Israel
- Digital signature support for Israel
- Electronic invoice/KSeF for Poland
- E-billing integration with ClearTax for India
- Online invoicing enhancements for Hungary
- Electronic invoice and electronic payments ATCUD support for Portugal
- Electronic signing for electronic invoices for Portugal
- E-delivery support for Greece
- Embed PDF support in the electronic document import Wizard

Tax management

- Support for external VAT calculation for all localizations except Israel
- VAT API for Denmark
- Tax setup APIs for Brazil
- Golden Tax interface update for China
- Multiple e-TDS in the A/P invoice for India

Tax reporting

- Electronic VAT report export support
- Withholding tax enhancements for Mexico
- Certificazione Unica enhancements for Italy
- Transmitting GST return for Singapore
- SAF-T tax report for Norway
- SAF-T report for Portugal
- E-books incl. online sales reporting with duty and expense classification enhancements for Greece

Inventory management and tracking

- Cargo tracking and tracing enhancements for the EU

Audit files

- Audit trail report
- Audit file (FEC) enhancements for France
- SAF-T report for Denmark (mandatory information)

Printing

- SAP Crystal Reports software layouts for Switzerland

Other

- Folio enhancements for Chile
- Operating profit and net income for Brazil
- A/P down payment request to support e-TDS for India
- Qualified invoice method for Japan
- 1099 forms enhancements for the United States
- Auto-renumbering for AFE authority for Argentina
- A/R, A/P invoice item invoice with no stock movement

SAP Business One 10.0: Key highlights up to FP 2502 (3/6)

Inventory | Distribution | Production

- Serial and batch numbers mgmt. enhancements
- Ability to change unit of measure (UoM) group of an item
- Additional authorization groups for price lists
- Item group name extended to 100 characters
- Support for setting UoM group as inactive
- Reverse and forward serial and batch no. trace report
- FIFO layers report by consumption order
- Drill-down from BOM to item master data
- Inventory counting enhancements
- Extending field length of item description and industry
- Modifying remarks and unified demand forecasts (UDFs) in closed production orders and pick lists
- Support for mass deletion of BOM
- Procurement confirmation wizard based on production orders
- Changing status of sales and purchase type in item master data
- Opening last prices report from item master data
- Displaying preferred vendor name in item master data
- Support for attachments for bill of materials
- Production order variance report extension

Financial management

- Drill-down to G/L accounts in financial reports
- Posting periods enhancements
- Journal entry remarks extended to 254 characters
- System messages before adding journal entries
- Extended journal entry references
- Updated journal entries with locked posting periods
- Enhanced printing preferences for payments and deposits
- Report refresh enablement
- Management of change log for exchange rates
- IFRS postings for fixed assets
- Tax code determination enhancements in procurement process
- Payment terms enhancements

SAP Business One 10.0: Key highlights up to FP 2502 (4/6)

Sales | Purchasing | Service

- Allowing update due date in partially reconciled invoices
- “Add and view” and “Add and close” in A/R and A/P docs
- Printing service calls and contacts
- Hiding blank lines in addresses
- Proc. confirmation wizard support for gross and net modes
- Enabling updating UDFs in closed documents
- Setting problem types, call status, and more as “Active”
- Flexible default “Valid until” date in sales quotation
- Linking single equipment card to multiple BPs
- New document status “Open e-mailed”
- Storing price list no. and name in marketing documents rows
- A/R invoice rows with no quantity postings
- Extended business partner effective price sources
- Ability to hide document remarks
- Copying attachment paths to target documents
- Cancellations of return requests
- Updating consolidating business partner and consolidation type at document level
- Customer and vendor reference number enhancement
- Document information extraction integration enhancement incl. service-type document support
- Display of sales document in procurement wizard if target document is canceled
- Relationship map support for reference documents and opportunity
- Moving rows up and down in marketing documents

CRM

- Customer and vendor group name extended to 100 characters
- Viewing and updating address UDFs in docs, service calls, and address format setup
- Support for filtering activity reports by UDFs
- Link between contact person and BP address
- Hiding inactive contact persons in BP master data
- Configuring display of employee name
- Telephone field extended to 50 characters
- Foreign name field extended to 200 characters

Project management

- Interactive Gantt chart
- Sorting order for project stages

SAP Business One 10.0: Key highlights up to FP 2502 (5/6)

Administration

- Support for attachments tab in additional objects
- Deleting live collaboration history by date range
- Enhancements in approval process
- Setting warning for single-user validation
- Deactivation of shipping types
- Hiding locked users
- Enhanced user removal management
- Open users—set up form in “Find” mode
- Messages and alerts cleanup tool
- Manual determination of path in general settings
- Adding detailed errors for license imports
- Enhancing license balloon appearance
- Main menu form settings for indirect access users
- Sort forms in user interface configuration template
- Support for "Hide BOM in component" in SAP Crystal Reports layouts
- Enhanced copy of single form settings
- Allowing change log to read-only documents
- Enabling retrieval of a default value of an SAP Crystal Reports parameter
- BP payment terms without price lists
- Change log enhancements for employee master data
- Managing change log for system setup entries
- Providing parameters for dunning letters in SAP Crystal Reports layouts

Authorization enhancements

- Tab-level authorizations in business partner and item master data
- Support for “Find next” function in authorizations form
- Change log entries for authorization user groups
- Authorization to use “Copy table”
- Authorizations for duplicate documents and records
- Authorizations in payments draft report
- Adding authorization to “Remove opportunity”
- Increased number of authorization groups
- New authorizations for timesheet
- Authorization change log

SAP Business One 10.0: Key highlights up to FP 2502 (6/6)

Platform | Extensibility

- **SAP HANA 2.0 adoption**
- **Support for SUSE Linux Enterprise Server 15**
- **Service layer configuration UI**
- Service layer support for Microsoft SQL database server
- Service layer support for views on Microsoft SQL
- User-defined values supporting multiple triggers
- UDO and UDT management through Web client
- Extending UDF support to additional objects
- Microsoft 365 integration
- Increasing menu item limit to 2,000
- Extend DI API and service layer coverage
- API access for CR reports
- Integration hub
- Security enhancements
- Support for Microsoft SQL 2022

- Extending service layer coverage
- Linking UDFs to system forms and user-defined objects
- Enabling DI access to system permissions
- Support for Visual Studio 2019 with SAP Business One studio
- Enhancing UI API error handling
- Support for queries through service layer
- Adding queries to menus
- Sizing guide for service layer
- Unification of installation and upgrade packages for SAP Business One
- Query manager enhancements
- Support for SAP Crystal Reports 2020 SP2
- Checkbox type for user-defined field
- UI API VS Code IDE:
 - Support for TypeScript
 - Support for additional views, such as Item master data
- New UI API controls:
 - Dialog view , date and time picker, and more

Bold = SAP HANA

Usability

- **New skin style**
- Enhanced user interface
- User name in license and add-on administration
- **Support for 4K monitors**
- Revised SAP Fiori UI for Service and Sales mobile app

Lifecycle management | Cloud

- Identity and authentication management support, on-premises and cloud (cloud control center)
- Microsoft Windows 11 support
- **SAP Business One application that works with and is powered by SAP HANA, supporting SUSE Linux Enterprise Server 15 SP4**
- Certificate verification enablement
- Password policy requirements for new installations
- Redesigned monitoring concept of job service
- Activating support user from the system landscape directory control center

Product direction

PUBLIC

This presentation and SAP's strategy and possible future developments are subject to change and may be changed by SAP at any time for any reason without notice. This document is provided without a warranty of any kind, either express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose, or noninfringement.

“We’re investing in the future and security of SAP Business One, enhancing its integration with the SAP Business Technology Platform to simplify development, and we’re **expanding the capabilities of its Web client.”**

These innovations ensure that SAP Business One **continues to grow and adapt to the evolving needs of small businesses.”**

Thomas Saueressig, Member of the Executive Board of SAP SE, Customer Services & Delivery
August 2024 ([Post at LinkedIn](#))

Product areas of future investment

Product vision: SAP Business One is SAP's leading ERP solution for small businesses and the lower midmarket, offering flexible deployment options including multitenant environment provisioned by SAP partners. It provides a globalized and robust business core while enabling cloud extensions through SAP Business Technology Platform and SAP Build solutions, all with a modern and intuitive user experience.

Core ERP engine

- Offering a highly competitive solution with **intuitive and modern Web client interface**
- Data and system security at the first place
- Improving the product continuously reflecting key customer and partner feedback
- Localization enhancements and addressing legal requirements
- Regular maintenance within efficient model

Partner co-innovations and extensions

- Further enablement for partner innovations through **SAP Build** and **SAP Business Technology Platform**
- Partners leveraging artificial intelligence technology and services to increase value for customers
- Improving robust developer experience on the Web client through the service layer, including new design concepts, APIs, objects, and tools

Flexible deployment model with cloud focus

- Giving freedom to choose to deploy SAP Business One on premises (single-tenant) or scale to a multitenant environment provisioned by SAP partners
- Supporting partners in customer's cloud transformation by extending cloud tools managed by partners

Helping ensure competitiveness

- Fast adoption of intuitive Web client design for new customer growth opportunities
- Transforming the latest innovations into customer value at lower TCO

SAP Business One releases and related products

Long-term product road map with continuous innovation

Core and related products	Releases
SAP Business One (version for SAP HANA and MS SQL)	<ul style="list-style-type: none">• Continuous enhancements through version 10 feature packages (FP) and support packages (SP)—SP 2505, FP 2508, SP 2511, FP 2602, . . .• Feature packages containing any type of change including innovation (such as Web client, integration, SAP BTP enablement, Customer Influence feedback, and more)• Version 11 to follow version 10 in 2027
Web client	<ul style="list-style-type: none">• Enhancements for working smoothly with SAP Business One using native web browser—accelerated delivery planned for 2025 and 2026
Cloud	<ul style="list-style-type: none">• Continuous enhancements for SAP Business One Cloud, partner-hosted options, through update patches (PL21, . . .)
Mobile apps	<ul style="list-style-type: none">• Continuous enhancements for all mobile apps through apps' updates

This is the current state of planning and may be changed by SAP at any time.

SAP Business One, version 11

Introduction of new generation of cloud management tools

Lifecycle management

- **Optimize deployment and upgrades**
 - Simplified installation and update processes
 - Introducing automation and component in-place upgrades
 - Exploring the potential use of containerization technology to enhance deployment flexibility and scalability
- **Unification of system landscape directory (SLD)**
 - A single SLD developed for cloud and on premises
 - Deployment type selection allowed during installation

Cloud operation center managed by partners

- **New generation of cloud control center**
- **Enhance identity and authentication**
 - Strengthening SSO, multifactor authentication, and modern authentication methods

Cloud-native integration

- **Enablement of native cloud storage integration**
 - Smooth connectivity to SharePoint, Google Drive, OneDrive, and other cloud storage platforms

Functionality

- Continuous Web client enhancements
- Item variants
- BOM versioning

Artificial intelligence

- Product extensibility enhancements for AI adoption by SAP partners

First release to come in 2027

- Further enhancements in feature packages based on partner and customer feedback
- Limited time of overlay with version 10 deliveries

This is the current state of planning and may be changed by SAP at any time.

SAP Business One

Product road map overview: Key themes and capabilities

Recent innovations

Core

- Web client extended sales, purchasing, service, inventory, and analytics functionality
- Continuous innovations based on market feedback (Customer Influence program)
- Enabling workflow integration with SAP Business One based on SAP Build Process Automation bots
- Enabling document templates with SAP Build Process Automation

Globalization

- EU Peppol: Utilization of the SAP Document and Reporting Compliance solution Peppol exchange service cloud edition
- Poland: Electronic invoice (KSeF)
- Singapore: Submission of GST return enhancements
- China: Golden Tax enhancements
- Germany: ZUGFeRD invoice import support in electronic document import wizard
- Germany: Adoption of new ERiC versions for ELSTER
- Israel: Donation model support
- Poland: Interest report enhancements
- Greece: Support for e-delivery
- Argentina: Concurrency issue in folio number assignment
- Hungary: Deferred VAT support for down-payment invoice

Mobile

- Service and sales apps update for Microsoft SQL Server, iOS, and Android

Extensibility and platform

- Identity and authentication management (IAM) introduction
- Enhanced service layer API including support for Microsoft SQL
- Microsoft 365 integration (Word, Excel, OneDrive)
- Windows 11 support
- Microsoft SQL 2022 support

Cloud

- Introduce IAM in SAP Business One cloud control center

Planned innovations

Core

- Web client extended sales, purchasing, payments, service, financials, production, inventory, analytics, and administration functionality
- A/P invoice creation automation using Document Information Extraction service in the Web client
- Continuous innovations based on market feedback (Customer Influence)
- Outlook 365 integration enhancements

Globalization

- Electronic documents service enhancements
- Integration with SAP Document and Reporting Compliance
- Change log report enhancements
- France: Support for electronic invoice receiving 2026
- Spain: Software certification support
- India: Multiple e-TDS support
- United Kingdom: "Making Tax Digital" support through SAP Document and Reporting Compliance
- Greece: Support for e-delivery enhancement
- Brazil: Tax reform and unencumbered tax support enhancement
- Embedded PDF creation

Extensibility and platform

- Enhanced service layer API
- Web client extensibility: UI API and VS Code IDE
- Webhooks
- Support for Microsoft Windows Server 2025
- Principal propagation (extension manager)
- Lifecycle management enhancements (Tomcat split for server tools)

Cloud

- Lifecycle management enhancements (tenant management, certificate management, and various operational optimizations across cloud control center)

Product direction

Core

- Extended Web client business process coverage
- Continuous innovations based on market feedback (Customer Influence)
- Optimized scalability and performance
- Simplification of landscape and deployment, support for containerization approach

Globalization

- Enhancement of existing markets and regions
- Integrations to electronic fiscal services
- IFRS compliance

Analytics

- Insight to action (data mining)
- Predictive, pervasive, and scalable
- Built-in content

Mobile

- Continuous innovations based on market feedback

Extensibility and platform

- Enhanced service layer API
- Enhanced Web client extensibility
- Event service support
- Support for virtualization platforms
- Upgrade simplification (support for component upgrade)

Cloud

- Upgrade simplification (component upgrade plus "in-place" upgrade for service unit)
- Backup management (SQL and SAP HANA)
- License server optimizations (such as consumption report and consistency checks)

This is the current state of planning and may be changed by SAP at any time without notice.

PUBLIC

This presentation and SAP's strategy and possible future developments are subject to change and may be changed by SAP at any time for any reason without notice. This document is provided without a warranty of any kind, either express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose, or noninfringement.

SAP Business One

What's coming next: Outlook on core solution delivery for the next releases (SP 2505, FP 2508)

Business processes and legal compliance

- High-value improvement requests (Customer Influence)
- Change log report enhancements
- Electronic file manager enhancement
- Electronic invoice enhancements for Argentina
- Electronic reporting enhancements for Portugal
- Electronic documents enhancements for Israel
- New software certification for Spain
- “Making Tax Digital” support through SAP Document and Reporting Compliance for the United Kingdom
- E-delivery support enhancement for Greece
- Document printing enhancement for Argentina
- Tax reform for Brazil
- Unencumbered tax enhancement for Brazil
- E-way bill for stock transfer for India
- Central deposit support for multiple branch companies

Cloud and infrastructure

- Enhanced security and compliance
- Expanded service layer coverage
- Improved lifecycle management (Tomcat split, modern authentication for SAP Business One mailer)
- Certificate verification (detect incompatibility during installation)
- Optimized identity and authentication (remembering IdP sign-in preference, SSO best practices for Web client)

This is the current state of planning and may be changed by SAP at any time.

SAP Business One

What's coming next: Outlook on Web client delivery for the next release (FP 2508)

Business processes

Extended usability support

- Attachment handling enhancements
- Multilanguage support

Extended business scope coverage

- Finance: Deposit and exchange rate table
- Marketing documents: Blanket agreement, recurring transactions, and landed cost
- Inventory: Pick and pack
- Production: Production order and resources
- Import from Microsoft Excel support

Business scope fine-tuning

- Extended setting and setup support
- Performance enhancements
- Marketing and inventory document enhancements

Analytics

- UDQs with parameters
- Initial phase of reporting framework

Extensibility and integration

Web client user interface API (UI API)

- VS Code wizard enhancements: TypeScript
- Dialog view enhancements
- Extend Web client UI API control support
- Extend Web client UI API views support

User-defined value (UDV)

- Support for master data, UDT, and UDO
- Extending UDV arithmetic and logical formula
- UDV central management

Microsoft 365 integration

- Enhanced mail support
- Enhanced attachments support
- Activity synchronization

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Core

Global, highly scalable real-time ERP

Feature

Optimize core business processes and continuously deliver enhancements and new features, based on [Customer Influence](#)

- Optimize functions in logistics and inventory
- Optimize functions in CRM and service
- Optimize functions in financial
- Enhance usability
- Enhance data protection and privacy
- Integrate SAP solutions adding value for SAP Business One customers

Lifecycle management

- Streamline upgrade and installation processes
- Enhance core stability and system robustness
- Improve identity and authentication management
- Boost job service performance and monitoring
- Optimize data import capabilities
- Help ensure compatibility with Microsoft Windows Server 2025

This is the current state of planning and may be changed by SAP at any time.

PUBLIC

This presentation and SAP's strategy and possible future developments are subject to change and may be changed by SAP at any time for any reason without notice. This document is provided without a warranty of any kind, either express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose, or noninfringement.

Planned innovations: Web client

Extend functional scope to cover end-to-end scenarios

Feature

Extended business logic coverage and user experience

- Sales and purchasing (including procurement wizards, document generation wizard)
- Service
- Financials (including fixed assets)
- Payments support (including bank reconciliation and payment wizard and bank statement processing)
- Inventory
- Projects
- Production (including material resource planning)
- Human resources
- Administration and setup

Analytics, reporting, and printing

- Extended analytics
- Additional reporting content
- Design capabilities
- Support for printing

Integration and extensibility

- Extensibility capabilities (such as UI API, user-defined values, webhooks)
- Microsoft 365 integration enhancements
- Outlook 365 integration enhancements
- A/P invoice creation automation using Document Information Extraction service

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Globalization

Legal compliance and localization enhancements

Feature

- Legal compliance and localization enhancements generically or specifically (legal requirements, business practice, statutory reporting, and default values)
- Electronic documents framework enhancements and country-specific built-in content using the electronic file manager add-on, electronic documents service, and integration framework
- Electronic documents service component enhancements
- Further integration and leveraging of existing cloud services from SAP for legal adaptations, such as SAP Document and Reporting Compliance

Country-specific changes:

- All: Change log report enhancements
- Brazil: Unencumbered tax for A/P documents
- Brazil: Tax reform
- Germany: Adoption of the new ERiC versions for ELSTER
- Germany: ZUGFeRD invoice generation
- France: Support for electronic invoice receiving 2026
- India: E-way bill support for stock transfer
- Israel: E-invoice enhancement
- Singapore: Peppol-ready Solution Provider C5 requirement
- Spain: Software certification support
- United Kingdom: “Making Tax Digital” support through SAP Document and Reporting Compliance

This is the current state of planning and may be changed by SAP at any time.

This document is provided without a warranty of any kind, either express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose, or noninfringement.

Planned innovations: Extensibility

Extend SAP Business One for verticals and custom scenarios

Feature

SAP Business One core

- Enhancement of service layer API
- Web client extensibility (UI API, user-defined values, user-defined objects, user-defined tables)
- Webhooks
- Side-by-side application support (SAP BTP enablement)

This is the current state of planning and may be changed by SAP at any time.

PUBLIC

This presentation and SAP's strategy and possible future developments are subject to change and may be changed by SAP at any time for any reason without notice. This document is provided without a warranty of any kind, either express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose, or noninfringement.

Planned innovations: Identity and authentication management

Single sign-on experience across SAP Business One components

Feature

Identity and authentication management

- Create a standardized process for “user propagation” when integrating with Azure and Entra ID
- Set user as superuser during binding operation
- Remember IdP’s sign-in preference
- Provide a best practice for signing into Web client with SSO
- Introduce password policy management for SAP Business One authentication service in system landscape directory
- Introduce "Forgot My Password" option in SAP Business One desktop and Web client
- Edit option for existing IdPs in system landscape directory (SLD)
- Enhance central user management in SLD (for example, expose license dimension, show user inactivity)
- Support additional industry-leading IdPs

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Cloud

Simpler consumption and best scaling

Feature

SAP Business One Cloud, partner-hosted option

- Enhanced tools in SAP Business One Cloud 1.1 control center focusing on hosting partners, improvements for user experience, monitoring, stability, and performance
- Lifecycle management optimization
 - Hot fixes (In-place upgrade)
 - Software component version control
 - Service unit setup
 - Tenant management
 - Backup management
 - License server optimizations
 - IdP setup and consumption
- Optimized partner support user functionality
- Support for virtualization platforms
- Security enhancements

SAP Business One Cloud, SAP-hosted option

- Security enhancements

This is the current state of planning and may be changed by SAP at any time.
